PART I - BUSINESS AND GENERAL INFORMATION

Item 1. Business

Overview

PT&T Corp. (Doing business under the name and style: PT&T) (the Company) was incorporated on November 14, 1962, under the laws of the Philippines as a diversified telecommunications entity catering to the corporate, small and medium business and residential segments. The Company is also a grantee of a franchise and holds various licenses to establish, install, maintain, operate and lease telecommunications systems, lines and circuits, wire or services, throughout the Philippines and other countries.

On November 3, 2023, the Securities and Exchange Commission (SEC) approved the following amendments to the Company's Articles of Incorporation:

- a. change of corporate name from Philippine Telegraph and Telephone Corporation to PT&T Corp. (Doing business under the name and style: PT&T);
- b. include the sale and distribution of information technology products, software, and services, and to provide shared services to subsidiaries, affiliates, and other companies in the Company's primary purpose; and
- c. increase of the authorized capital stock from ₱3,800.0 million to ₱12,600.0 million in line with the Company's Corporate Rehabilitation Plan (Rehab Plan) (see Note 14).

The Company's registered office address is at the 6th Floor SCC Bldg. 106, Carlos Palanca St., Legaspi Village, Makati City and is domiciled in the Philippines.

Legislative Franchise and Other Licenses

Legislative Franchise

On June 20, 1964, the Company was granted a 25-year national legislative franchise under Republic Act (RA) No. 4161, as amended by RA Nos. 5048 and 6970, allowing the Company to establish, install, maintain and operate wire and/or wireless telecommunications systems, lines, circuits and stations throughout the Philippines for public domestic and international communications, and to provide domestic record communications services which consisted of telex, telegraph, and private leased circuits. On July 21, 2016, the Company was granted an extension of its franchise for another 25 years under RA No. 10894, *An Act Extending to Another Twenty-Five (25) Years the Franchise Granted to the Philippine Telegraph & Telephone Corporation (PT&T) to Establish, Install, Maintain and Operate Wire and/or Wireless Telecommunications Systems, Lines, Circuits and Stations Throughout the Philippines for Public Domestic and International Communications under RA No. 4161, as Amended*.

On August 25, 2017, Republic Telecommunications Holdings, Inc. (RETELCOM) and Menlo Capital Corporation (MENLO) entered into a Sale and Transfer Agreement wherein RETELCOM agreed to sell and transfer 560,000,000 common shares, representing 37.33% ownership interest of the Company in favor of MENLO. On February 20, 2018, the Subcommittee on Oversight (Legislative Franchise) (the "Subcommittee") of the House of Representatives conducted a public hearing on the alleged sale of the Company's ownership interest to MENLO without Congressional approval. Pursuant to Section 14 of RA No. 10894, a franchise grantee shall not sell its controlling interest without the prior approval of the Congress of the Philippines.

The Company submitted a Position Paper on March 7, 2018 followed by a Supplemental Position Paper on March 21, 2018 to clarify all concerns on the compliance by the Company of the provisions of its franchise. As at the date of the approval of these financial statements, the Company has yet to receive any response or resolution from the Subcommittee on Oversight (Legislative Franchise). Considering the facts and the applicable laws involved in this inquiry, the management, in consultation with its legal counsel, has assessed that this matter does not and will not have an impact on the Company's operations.

Licenses with National Telecommunications Commission (NTC)

The Company has various Certificates of Public Convenience and Necessities (CPCNs) granted by the NTC which enable the Company to (a) provide data communications (Datacom) services, (b) implement its expansion and improvement programs covering among others the installation, operation, and maintenance of an integrated digital network in the National Capital Region (NCR), and (c) install, operate and maintain a national packet data network with the accompanying authority to charge rates for said services.

Aside from the NTC-authorized Datacom services, the Company was granted a CPCN that enables the Company to participate in the government's liberalization of telecommunications industry as mandated under Executive Order (EO) No. 109. While beforehand the Company was already operating as an inter-exchange carrier pursuant to the NTC Case No. 90-129 which enabled the Company to provide inter-exchange trunk facilities to connect with local exchange carriers (LEC) and public calling offices for long distance toll service, the said EO 109 thereafter enabled the Company to become a LEC operator authorized under NTC Case No. 94-022. As a LEC operator, the Company was granted Region IV-A comprising of the provinces of Aurora, Laguna, Marinduque, Quezon, Rizal, and Romblon for LEC services. The Company, along with its related party, Capitol Wireless, Inc. (CWI), has been granted the CPCN to establish, operate and maintain international gateway facilities to/from foreign countries as authorized under NTC Case Nos. 93-144 and 94-022.

The Company also has ongoing applications with the NTC to upgrade its existing CPCNs for additional service areas to complement the Company's plan of nationwide network rollout. As at the date of the approval of these financial statements, these applications are pending with the NTC.

The Company is also registered as a value-added service (VAS) provider with the NTC which allows the Company to offer internet access service; virtual private network, electronic mail service, messaging services, web hosting, electronic commerce, firewall service, e-learning, business application, network security, business resiliency, and data and analytics. The Company's VAS license is valid until September 5, 2026.

Status of the Shares Listing in the Philippine Stock Exchange (PSE)

On January 10, 1990, the Company listed its common shares in the PSE. On December 10, 2004, the Company requested the voluntary suspension of the trading of its shares which was approved by the PSE on December 13, 2004. The Company, however, continues to comply with the reportorial requirements of the SEC, the PSE, and the Bureau of Internal Revenue (BIR).

In 2017, the Company requested for the lifting of the voluntary suspension of the trading of its shares with the PSE. Accordingly, the Company submitted an Amended Registration Statement and other required reports to the Markets and Securities Regulation Department (MSRD) of the SEC.

After the Company's full compliance with the SEC requirements, the Company Registration and Monitoring Department of the SEC issued a certification relating to the Company's good standing with the SEC on April 29, 2021. Subsequently, the MSRD issued an Order dated August 4, 2021, lifting the suspension of the Company's Registration Statement.

The Company continues to update the PSE on its implementation of the court-approved rehabilitation plan (the "Rehab Plan") as it evaluates the request for the lifting of the voluntary suspension of the trading of its shares. As at the date of the approval of these financial statements, the result of the said evaluation is still pending with the PSE.

Status of Corporate Rehabilitation

On August 20, 2009, the Company, RETELCOM, Philippine Wireless, Inc. (PWI), Capitol Wireless, Inc. (CWI), and Wavenet Philippines, Inc. (WPI) collectively referred to as the "RETELCOM Group" jointly filed a petition for Corporate Rehabilitation (Corp Rehab) and Suspension of Payments pursuant to the *Rules of Procedure on Corporate Rehabilitation* (A.M. No. 00-8-10-SC). On August 24, 2009, the rehabilitation court (Rehab Court) issued an order staying enforcement of all claims, whether for money or otherwise against the RETELCOM Group (Stay Order) and appointing a rehabilitation receiver (Rehab Receiver).

On April 1, 2011, the Rehab Court approved the RETELCOM Group's Rehab Plan which was immediately executory. However, during the same year, certain creditors whose claims constitute a minority of the Company's total liabilities filed before the Court of Appeals (CA) a petition assailing the Rehab Court's approval of the Rehab Plan. On May 19, 2017, the CA rendered a decision reversing the Rehab Court's approval of the Company's Rehab Plan. On December 4, 2017, the RETELCOM Group filed a Petition for Review before the Supreme Court (SC). The result of the said review, however, is still pending with the SC at the date of these financial statements.

On July 27, 2018, the Company requested the Rehab Court that it be allowed to exit from rehabilitation subject to certain requirements which was approved by the Rehab Court on August 6, 2018. These requirements include, among others, the increase of the authorized capital stock which will allow the Company to settle its liabilities through debt-to-equity conversion as mandated by the approved Rehab Plan.

On November 3, 2023, the SEC approved the Company's increase in authorized capital stock to accommodate the debt-to-equity conversion of deposits for future stock subscriptions amounting to ₱8,709.6 million in accordance with the Rehab Plan and partially settled its statutory obligations, salaries, wages and other employee benefits out of its escrow accounts as at December 31, 2023.

Under the Corp Rehab Plan, however, the Company still has to request for a temporary exemptive relief from the SEC under the Securities Regulation Code (SRC) Rule 72.2, and the PSE to lift the suspension of the trading of the Company's common shares, without any sanctions or penalties, and for the Company to comply with all the applicable rules and regulations of the SEC and PSE so that the trading of all the authorized shares of the Company shall not in any way be suspended or restricted except as provided by law. Moreover, the Company has to enroll and list all its authorized redeemable shares as freely "tradable" shares with PSE.

In the meantime, any sale or disposition of the petitioner's properties, whether real or personal, is subject to the Rehab Court's evaluation and approval, and all unpaid obligations to claimants covered by the Rehab Plan are subject to legal interest of 6% from the approval of the Rehab Plan until full payment.

Status of Operations

The Company has incurred a deficit of ₱11,646.7 million and ₱11,665.0 million as at December 31, 2024 and 2023, respectively, and is still under Corp Rehab. These factors indicate a material uncertainty which may cast doubt on the Company's ability to continue as a going concern.

The Company also partially paid its statutory obligations, salaries, wages and other employee benefits using its escrow accounts as at December 31, 2024 and 2023. As of date, the company is in the process of complying with all the directives in its Corp Rehab Plan and the management is optimistic to complete the same and exit the Corp Rehab in April 2025.

To further improve its financial position, sustain operations, and exit from the Corp Rehab status, the Company is expanding its digital infrastructure network and diversifying its service offerings through a combination of own build and strategic partnerships.

To expand its fiber footprint, achieve incremental connectivity targets and reduce maintenance costs, the Company also completed notable infrastructure projects such as, node and building ports utilization, fiber upgrade, and pole attachments and access cable rehabilitation.

In December 2023, the BOD approved the Company's plan to upgrade its existing CPCNs and apply for additional service areas with the NTC to support the Company's expected nationwide network roll-out. The Company engaged the services of one of the world's largest financial advisory group to raise the necessary funds for the network expansion and roll-out.

Joint Venture (JV) Agreement

On August 6, 2024, the Company entered into a JV agreement with Netlinks Global Services (Aust & NZ) PTY Limited, a company organized and existing under the laws of Australia, to form a joint venture company in the Philippines. On November 27, 2024, a separate vehicle was incorporated under the operating name of SecureLink Networks Incorporated (SecurLink). The authorized capital stock shall be the Philippine peso equivalent of USD 475,000 or ₱26.7 million, divided into ₱1.00 par value a share.

Under the JV agreement, the Company will own 51% equity ownership of the joint venture in exchange for service, property and other operating expenses during the operational transition period equivalent to ₱13.6 million or USD 242,000. Netlinkz Global Services (Aust & NZ) PTY Limited, on the other hand, will own 49% equity ownership for a cash consideration of ₱13.1 million or USD 233,000. The Company will account for its investment in SecureLink as investment in a subsidiary. As at the reporting date, the Company has not made any capital contribution yet to the joint venture.

SecureLink will operate and distribute Starlink satellite internet equipment and services. This joint venture will serve as the Philippines' hub for Netlinkz' cutting-edge products, featuring the advanced Virtual Secure Network Plus (VSN+). Additionally, it will leverage on the availability of broadband connectivity provided by smaller, portable and mobile satellite dishes offering broadband internet to previously inaccessible regions. Through this partnership, enterprises throughout the country, particularly in areas historically underserved by traditional fibre internet providers, will gain access to this high-speed, low-latency connectivity with enterprise grade network security. The Company offers StarLink services which includes, the Starlink kit, enterprise solutions for fixed broadband services, mobile application, maritime and data volume-based services. The joint venture will expand and solidify the market base for Starlink services in the Philippines.

Approval of the Financial Statements

The financial statements as at and for the years ended December 31, 2024 and 2023 (with comparative figures for 2022) were approved and authorized for issue by the BOD, as approved and endorsed by the Audit Committee, on April 11, 2025.

Item 2. Properties

A. Description of Property

The principal properties of the Company which consists of land, buildings, other land improvements, telecommunication equipment, machinery and equipment, and office equipment are located at the main office of the Company which is situated at 106 C. Palanca Jr. St., Legaspi Village, Makati City.

The Company's real properties as of December 31, 2024 are as follows:

	Property Location	Address	Lot Area
1	SCC Bldg. Carlos Palanca, Makati	106 SCC Bldg., C. Palanca Street, Legaspi Village, Makati City	858 sqm lot with 7-storey bldg.

10	Tacloban City, Anibong Dist	Lot 1713, Barrio of San Jose, City of Tacloban, Leyte	400 sqm

B. Mortgage, lien or encumbrance.

The Company's property, plant and equipment are pooled under a mortgage trust indenture (the MTI) which is managed by the MTI Trustee, Export Industry Bank – Trust as successor of Philippine National Bank – Trust Group. Mortgage participation certificates are given by the MTI

Trustee to secured creditors principally as security for their long-term loans to the Company, representing their respective pro-rata interest over the collateral pool.

However, pursuant to the Rehab Order, the obligations to the secured creditors have been settled already by way of their conversion to 12-year Series "A" redeemable preferred shares. Consequently, it is the Company's contention that there are no more MTI liens and encumbrances over the Company's property, plant and equipment.

The Rehab Court, per its Order dated August 2, 2018, clarified that the 12-year payment plan under the Serial Redeemable Preferred Shares shall be counted from the issuance of the corresponding 12-year redeemable preferred stock certificates to the Claimants concerned. Likewise in the same Order, the Rehab Court granted the Company's Motion for Leave to Sell and/or Dispose Certain Assets dated October 12, 2015, and that all records of the PT&T-Mortgage Trust dated December 1991 including the owner's duplicate original of the Transfer Certificate of Title (TCT) and the chattel and other related documents under the custody of the MTI Trustee be transferred and released to the custody of the Rehab Receiver.

C. Lease Agreements

The company has entered into various lease agreements on office space, cell sites telecommunications equipment locations and car rentals. The operating lease agreements age for periods ranging from 1 to 5 years from the date of contracts.

The Company's investment properties consist of land and improvements in various locations in NCR and Region 4. Some of the land with improvements, which are not being used by the Company for its operations, are rented out in the ordinary course of business for a fee to third parties for one (1) to five (5) years lease term and are renewable subject to mutual consent of both parties, while others are held for capital appreciation.

Item 3. Legal Proceedings

The Company is a respondent in several labor cases. Majority of these labor cases stemmed from the financial difficulties experienced by the Company which led to the filing of a Petition for Rehabilitation in 2009. As a consequence of the Stay Order issued by the Rehabilitation Court, proceedings in all these labor cases were suspended. In compliance with the Rehabilitation Plan, the Company is currently undertaking the settlement of these labor cases. The possible liability of the Company arising from the labor disputes is indicated in Note 3 of the Company's Audited Financial Statements.

The Company is likewise a party in several collection cases. These collection cases were due to non-payment of obligations as a direct consequence of the financial difficulties experienced by the Company. This difficulty ultimately led to the filing by the Company of a Petition for Rehabilitation in 2009. The proceedings in these cases were likewise suspended pursuant to the Stay Order issued by the Rehabilitation Court. The amount involved in these cases are part of or are included in the obligations mentioned in the Audited Financial Statements which are to be settled through debt-to-equity conversion and the issuance of Series "A", "B" and "C" Serial Redeemable Preferred Stocks. Conducting a debt-to-equity conversion was mandated under the Company's Rehabilitation Plan which was approved by the Rehabilitation Court in an Order dated 01 April 2011.

The Company also filed before the Court of Appeals a petition against the NTC assailing the amount of the Supervision and Regulatory Fee ("SRF") the NTC is collecting from the Company. The Court of Appeals partially granted the petition of the Company but remanded the case to the NTC for the re-computation of the SRF. The Company filed a Motion for Partial Reconsideration while the NTC filed its own Motion for Reconsideration. The Company's Motion for Partial Reconsideration and the NTC's Motion for Reconsideration were denied by the Court of Appeals in a Resolution dated August 20, 2020.

On October 20, 2020, the company filed a Petition for Review with the Supreme Court to assail the Decision and Resolution of the Court of Appeals. The NTC likewise filed its own Petition for Review with the Supreme Court.

As of the date of this report, the said petitions are still pending with the Supreme Court.

The Company likewise filed a petition with the Supreme Court against the NTC and several entities questioning the selection process and the award of the New Major Player in the Philippine Telecommunications Market. The parties have already filed their respective pleadings and are awaiting further directive from the Supreme Court.

Item 4. Submission of Matters to a Vote of Security Holders

Except for matters taken up during the annual meeting of stockholders, there was no other matter submitted to a vote of security holders during the period covered by this report.

PART II - OPERATIONAL AND FINANCIAL INFORMATION

Item 5. Market for Issuer's Common Equity and Related Stockholder Matters

Revenue

For the year ended December 31, 2024, the Company's operating revenues is ₱536.2 million compared to ₱528.7 million and ₱542.2 million in 2023 and 2022, respectively. Fixed broadband business is still the main revenue stream of the Company, contributing 81% or ₱432.4 million.

Additionally, new revenue stream from IT Services made a significant impact on the revenue performance as the Company was able to generate an additional 103.8M in revenues. IT Services is expected to provide new opportunities for the Company in the coming years.

Cost and expenses

For the year ended December 31, 2024, personnel related expenses amounted to ₱228.7 million. In 2024, personnel related expenses decreased to ₱228.7 million from ₱268.0 million in 2023, mainly driven by lower headcount. The number of personnel decreased from 248 at the start of the year to 217 at year-end.

Premises-related expenses slightly increased to ₱25.7 million in 2024 from ₱25.4 million in 2023 and ₱24.5 million in 2022. In 2024, other selling, general and administrative expenses amounted to ₱97.8 million, higher than the previous year at ₱91.5 million since the Company has invested in software to streamline its processes in the last 2 years. Due to the increasing bandwidth requirement of its clients, the Company's upstream connections and international connectivity increased to ₱12.3 million from ₱12.2 million in 2023. Lastly, cost of sales contributed ₱121.6 million in core expenses, indicating more product offerings provided by the Company to its growing customer base.

Profitability Performance

Over the past three years, the Company has produced core EBITDA during the years 2024, 2023 and 2022 in the respective amounts of ₱83.6 million, ₱138.1 million and ₱110.9 million. The Company posted ₱18.2 million net income for the year ended December 31, 2024, compared to net loss of ₱7.9 million in 2023.

The Company's total assets amounted to ₱1,177.8 million as of December 31, 2024, compared to ₱1,113.6 million and ₱1,045.1 million as of December 31, 2023, and December 31, 2022, respectively. The increase in assets is driven by an increase in working capital from growth in fixed broadband operations and new IT Services business, and investments in fixed and plant assets to support the expansion of the Company's business.

The increase in total liabilities pertains to payable to suppliers and other accrued operating expenses and accrued interest payable under the rehabilitation plan.

B. Plan of Operation

PT&T believes that information and communication technologies are the backbone of innovation. But no innovation can occur without the high-speed broadband network. The future of countries, businesses and individuals will depend more than ever on whether they embrace technology and many of those who stand to gain the most are not yet connected.

The Company holds an optimistic view on the Philippines' broadband industry through our efforts to improve coverage and spur subscriber growth. PT&T aims to expand coverage and upgrade its network infrastructure, which will help it to cope with the growing demand and ensure that network congestion will be minimized.

The Philippines has made huge investment in the national broadband network and ramping up network modernization investments in order to take advantage of the huge data opportunities in a fast-growing nation. The Company continues to believe that the market can accommodate more players, which would be beneficial to innovations and long-term growth. The local economy's remarkable momentum will continue fueled by strong sequential gains in investment activity and private consumption.

PT&T also aims to help shape the high-speed internet connection as a true and open platform and as a driver of economic development and social progress.

In order to achieve these objectives, the Company has several projects lined up which will expand PT&T's capability to provide telecommunications services throughout the country.

PT&T is currently serving Metro Manila and the nearby CALABARZON. In order to increase its subscribers' base, PT&T is in the process of completing its plan to expand its existing telecommunications network. The network expansion will initially focus on key cities in the National Capital Region, CALABARZON and parts of Northern Luzon. Once fully implemented, the expanded network will be capable of servicing at least 40% of the Philippine population.

Our connectivity strategic focal points are:

- *Organic Expansion and WiFi projects.* PT&T will upgrade and use existing network in CALABARZON with a potential of additional 39,800 fiber kilometers and implement last mile (including WiFi) projects. Capital expenditure to complete the project is ₱1,340 million. The residential business is an important facet of the Company's future growth as a major telco player and will be a key undertaking in its network expansion plans. To enable the Company's growth aspirations in this segment, the Company have established pilot areas in a few communities in NCR so it can build a scalable model which PT&T plans to deploy upon rollout particularly in CALABARZON where

demand continues to be underserved. In addition to these investments, the Company is also developing the process and systems that will allow for a simple customer journey for its residential service.

- *Nationwide Network Backbone.* PT&T aims to build a nationwide backbone for both enterprise and wholesale and carrier markets with a potential of additional 51,800 fiber kilometers, requiring future capital expenditure of ₱5,790 million. This development may take time, but the Company have built the foundations required to scale the Company's business successfully. Included here are plans which will allow us to serve an even larger market with much-needed, improved internet services in the country. In the near-term, the Company is prioritizing network rollout inside industrial parks in CALABARZON such as Calamba Premiere International Park, Cavite Export Processing Zone Authority, First Philippine Industrial Park, and in new buildings within the Central Business District areas (Makati, Ortigas, and Bonifacio Global City) targeting SMEs and large enterprises.

PT&T is also teaming up with strategic partners for domestic backbone expansion covering Luzon, Visayas and Mindanao as well as international presence in Asia and in the US.

Innovation is increasingly based on digital technologies and business models, which can drive economic and social gains from ICT if channeled in a smart way. The way businesses adopt ICT is key for leveraging them for development, so encouraging businesses to fully embrace the powers of digital technologies is a priority of PT&T. The Company aims to step up efforts to invest in innovative digital solutions to drive economic growth and social impact. This will include building capabilities in cyber security, Internet of Things and smart cities.

PT&T's IT Services business unit will focus on projects, services, and applications such as but not limited to:

- Offer a "One Stop E-Center". Another large project in *the Company's* pipeline is providing a common IT infrastructure to host all kinds of e-services. This includes e-learning, e-government, e-commerce, telemedicine and applications in order to fully support the government's initiatives as well as the increasing requirements and demands of the private sector.
- Build Data Centers. Over time, data centers have evolved from traditional vendor-specific hardware and software appliances to common-off-the-shelf server hardware and open-source software hosting individual network functions and services. Accordingly, *the Company* is building data centers that will shelter fixed broadband, IT, and mobile telecom infrastructure for contents, applications, and other network services. PT&T will employ the latest data center technology to reduce total cost of ownership across the different network domains and to offer end-to-end services to its customers. Specifically, *the Company* plans to deploy software through Network Function Virtualization (NFV), and for virtualization to scale, *the Company* will set up a cloud environment that will enable automated network operations and can save significant operational costs. And because the service is implemented entirely in software, the Company will be able to innovate more rapidly and drive new service revenues. New IT Services offerings will include co-location / hosting services, cloud solutions such as Infrastructure-As-A-Service (IaaS), Software-As-A-Service (SaaS), DR-As-A-Service (DRaaS) and other Managed Services.
- Offer Security and "Cyber Security" Services and Applications. PT&T aims to dramatically simplify IT security and compliance with best-in-class solutions that leverage next generation SIEM platform combined with crowdsourced global intelligence. The combination of this infrastructure with PT&T security experts provides enterprises unparalleled security protection and threat awareness. The Company have partnered with the leading security services provider with a complete set of security tools and services offering a variety of flexible delivery options that allow us to serve customers of all sizes and complexity. *The Company's* various alliances with global IT Security experts aim to develop and maintain an ecosystem of best-of-breed technology partnerships and alliances that result in a world-class IT Security solution stack and consulting services that offers best-fit technology and supports the requirements of its customers.

Lastly, despite the rapidly evolving technology, PT&T is still keen on its interests to provide mobile services in the Philippines since the smartphone penetration continues to grow and the advent of 5G technology provides an ability for PT&T to enhance various applications.

PT&T is likewise exploring and studying the latest network concepts in implementing "virtualization" of network components into data centers. This will expectedly reduce the number of network elements deployed throughout the country and substantially reduce the cost and implementation period.

As of December 31, 2024, the Company has a total of 217 employees and the Company projects that the said number will increase to 265 by the end of 2025.

²Non-core items include accrued penalties, rehab-related initiatives and third telco initiatives.

Net income

Net income is a key performance metric that indicates how well the Company performed after all costs of the business have been considered.

PT&T made significant investments in network and operations to build sustainable growth in recent years. These investments to rehabilitate and its network and improve the Company's operational capabilities have resulted in improved profitability.

Core EBITDA and Core EBITDA Margin

Core EBITDA (Earnings before Interest, Taxes, Depreciation and Amortization) is calculated as operating revenues and income fewer operating expenses attributable to the core business of the Company. Non-core expenditures pertain to those that are not related to the core business of the Company but are connected to improve PT&T's financial condition (e.g., rehab-related expenses, SEC fees for increase in capital stock for rehab exit, etc.). This metric provides an indication of how well the core business of the Company is performing before considering those initiatives being subsidized by operations. Core EBITDA has been adjusted for prior years to reflect changes in accounting standards to improve comparability.

Core EBITDA remains positive throughout the years. Impact of restrictions due to the pandemic lowered the core EBITDA in 2022 but was able to achieve almost 22% growth in 2023. This growth is attributable to the increase in revenues and savings in operating expenses. This continued in 2024 as the Company experienced a 15.37% growth in Core EBITDA.

Operating Revenue Growth

Revenue growth provides an indication of how well the Company generates revenue to support its operations and initiatives versus the comparative period.

For the past 3 years, the Company has consistently achieved positive revenue growth. In 2022, it experienced a steady revenue growth of 9% mainly due to the impact of the COVID-19 pandemic. Revenue growth in 2023 and 2024 is -2.5% and 1.43% respectively, as the Company continues its operations to bridge the technological gap of connectivity and IT solutions.

Number of billable/active circuits

Number of billable/active circuits pertain to the number of subscription lines or customers in the PT&T network.

The number of subscribers decreased slightly by 7% due to the implementation of stricter automatic disconnection due to non-payment. Enterprise subscribers comprise 86% of subscribers and are the main source of fixed broadband revenue.

Average revenue per unit (ARPU)

Average revenue per unit measures the recurring revenue generated for each circuit connected to the PT&T network. This is computed by dividing the recurring revenue for the period by the average number of active circuits and then dividing the resulting amount by the number of months in the period.

The Company's ARPU has slowly increased since 2023 indicating an increase in value of newly acquired subscribers.

Item 7. Financial Statements

The Audited Financial Statements for the year ended December 31, 2024, are attached for reference.

Item 8. Information on Independent Auditors and Other Related Matters

Independent Auditors' Fees and Services

The external auditor of the Company is the audit firm of Reyes Tacandong & Co. (RT & Co.). The Board appointed RT & Co. as the Company's independent auditor for 2024 in the meeting conducted last July 26, 2024. The appointment of RT& Co. as the Company's independent auditor was approved by the stockholders in the stockholders meeting conducted last September 27, 2024.

The company paid ₱1,045,000 for the audit of the financial statements for full year ending December 31, 2023. In the same manner, the company accrued ₱1,100,000 for its December 31, 2024, calendar year audit.

Changes in and Disagreements with Independent Auditors on Accounting and Financial Disclosure

To the best of our knowledge, there are no disagreements on any matter of accounting principles or practices, financial statement disclosure or accounting scope or procedure with the Company's external auditor.

STATEMENT OF MANAGEMENT'S RESPONSIBILITY FOR FINANCIAL STATEMENTS

The Management of **PT&T Corp.** (the Company) is responsible for the preparation and fair presentation of the financial statements including the schedules attached therein, for the year ended December 31, 2024, 2023 and 2022, in accordance with the prescribed financial reporting framework indicated therein, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors is responsible for overseeing the Company's financial reporting process.

The Board of Directors reviews and approves the financial statements including the schedules attached therein and submits the same to the stockholders.

Reyes Tacandong & Co., the independent auditor appointed by the Stockholders, have audited the financial statements of the Company in accordance with Philippine Standards on Auditing, and in their report to the stockholders, have expressed their opinion on the fairness of presentation upon completion of such audit.

INDEPENDENT AUDITORS' REPORT

The Stockholders and the Board of Directors
PT&T Corp.
6th Floor SCC Bldg. 106
Carlos Palanca St., Legaspi Village
Makati City

Opinion

We have audited the accompanying financial statements of PT&T Corp. (Doing business under the name and style: PT&T) (the Company), which comprise the statements of financial position as at December 31, 2024 and 2023, and the statements of comprehensive income, statements of changes in equity and statements of cash flows for the years then ended, and notes to financial statements, including a summary of material accounting policy information.

In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company as at December 31, 2024 and 2023, and its financial performance and its cash flows for the years then ended in accordance with Philippine Financial Reporting Standards (PFRS) Accounting Standards.

Basis for Opinion

We conducted our audits in accordance with Philippine Standards on Auditing (PSA). Our responsibilities under those standards are further described in the *Auditors' Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Company in accordance with the Code of Ethics for Professional Accountants in the Philippines (Code of Ethics) together with the ethical requirements that are relevant to the audit of the financial statements in the Philippines, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Material Uncertainty Related to Going Concern

As discussed in Note 1 to the financial statements, the Company has incurred a deficit of ₱11,646.7 million and ₱11,665.0 million as at December 31, 2024 and 2023, respectively, because of significant operating losses incurred in prior years and is still under Corporate Rehabilitation Plan (Corp Rehab). As of date, the Company is in the process of complying with all the directives in its Corp Rehab Plan and the management is optimistic to complete the same and exit the Corp Rehab in April 2025.

Moreover, in 2018, the Company was subjected to a congressional inquiry regarding its compliance with the provisions of its legislative franchise on the sale of the Company's ownership interest to Menlo Capital Corporation. The Company has submitted a position paper in March 2018 to clarify all concerns on its compliance. The resolution on the inquiry, however, is still pending as of date.

These factors indicate a material uncertainty which may cast doubt on the Company's ability to continue as a going concern.

The Company, however, has a positive equity of ₱62.4 million and ₱37.3 million as at December 31, 2024 and 2023, respectively, and has partially settled statutory obligations, salaries, wages and other employee benefits using its escrow accounts as at December 31, 2024 and 2023.

To further improve its financial position, sustain operations, and exit from the Corp Rehab status, the Company is expanding its digital infrastructure network and diversifying its service offerings through a combination of own build and strategic partnerships, which include: (a) entering into business ventures with a foreign supplier to offer Starlink satellite internet equipment and other complementary services in the Philippines; (b) undertaking significant infrastructure projects to expand customer base; and (c) upgrading of its existing licenses to complement the Company's network expansion and roll-out. The Company is also engaging the services of one of the world's largest financial advisory group to raise funds for the Company's network expansion and roll-out. These business development initiatives are discussed further in Note 1 to the financial statements.

Management and its legal counsel have assessed that the congressional inquiry will be resolved favorably and will not have an impact on its operations.

Our opinion is not modified in respect of these matters.

Key Audit Matter

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current year. These matters were addressed in the context of our audit of the financial statements as a whole and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Except for the matter described in the *Material Uncertainty Related to Going Concern* section, we have determined that there are no other key audit matters to communicate in our report.

Other Information

Management is responsible for the other information. The other information comprises the information included in the SEC Form 20-IS (Definitive Information Statement), SEC Form 17-A and Annual Report for the year ended December 31, 2024, but does not include the financial statements and our auditors' report thereon. The SEC Form 20-IS (Definitive Information Statement), SEC Form 17-A and Annual Report for the year ended December 31, 2024 are expected to be made available to us after the date of this auditors' report.

Our opinion on the financial statements does not cover the other information and we will not express any form of assurance or conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

Other Matter

The financial statements of the Company as at and for the years ended December 31, 2022 were audited by another auditor whose report dated April 11, 2023 expressed an unmodified opinion on those financial statements. The opinion of such auditor, however, excluded the restatements to the financial statements.

As part of our audit of the financial statements as at and for the year ended December 31, 2023, we also audited the adjustments described in Note 24 that were applied to restate the financial statements as at and for the year ended December 31, 2022. In our opinion, such adjustments are appropriate and have been properly applied. We were not engaged to audit, review, or apply any procedure to the Company's financial statements as at and for the year ended December 31, 2022 other than with respect to the adjustments and accordingly, we do not express an opinion or any other form of assurance on the financial statements as at and for the year ended December 31, 2022 taken as a whole.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with PFRS Accounting Standards, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with PSA will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, these could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with PSA, we exercise professional judgment and maintain professional skepticism throughout the audits. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audits in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audits.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence and communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partner on the audit resulting in this independent auditors' report is Emmanuel V. Clarino.

NOTES TO FINANCIAL STATEMENTS
AS AT AND FOR THE YEARS ENDED DECEMBER 31, 2024 AND 2023
(With Comparative Figures for 2022)

1. Corporate Information

PT&T Corp. (Doing business under the name and style: PT&T) (the Company) was incorporated on November 14, 1962 under the laws of the Philippines as a diversified telecommunications entity catering to the corporate, small and medium business and residential segments. The Company is also a grantee of a franchise and holds various licenses to establish, install, maintain, operate and lease telecommunications systems, lines and circuits, wire or services, throughout the Philippines and other countries.

On November 3, 2023, the Securities and Exchange Commission (SEC) approved the following amendments to the Company's Articles of Incorporation:

- a. change of corporate name from Philippine Telegraph and Telephone Corporation to PT&T Corp. (Doing business under the name and style: PT&T);
- b. include the sale and distribution of information technology products, software, and services, and to provide shared services to subsidiaries, affiliates, and other companies in the Company's primary purpose; and increase of the authorized capital stock from ₱3,800.0 million to ₱12,600.0 million in line with the Company's Corporate Rehabilitation (Corp Rehab) Plan (see Note 13).

The Company's registered office address is at the 6th Floor SCC Bldg. 106, Carlos Palanca St., Legaspi Village, Makati City and is domiciled in the Philippines.

Legislative Franchise and Other Licenses

Legislative Franchise

On June 20, 1964, the Company was granted a 25-year national legislative franchise under Republic Act (RA) No. 4161, as amended by RA Nos. 5048 and 6970, allowing the Company to establish, install, maintain and operate wire and/or wireless telecommunications systems, lines, circuits and stations throughout the Philippines for public domestic and international communications, and to provide domestic record communications services which consisted of telex, telegraph, and private leased circuits. On July 21, 2016, the Company was granted an extension of its franchise for another 25 years under RA No. 10894, *An Act Extending to Another Twenty-Five (25) Years the Franchise Granted to the Philippine Telegraph & Telephone Corporation (PT&T) to Establish, Install, Maintain and Operate Wire and/or Wireless Telecommunications Systems, Lines, Circuits and Stations Throughout the Philippines for Public Domestic and International Communications under RA No. 4161, as Amended*.

On August 25, 2017, Republic Telecommunications Holdings, Inc. (RETELCOM) and Menlo Capital Corporation (MENLO) entered into a Sale and Transfer Agreement wherein RETELCOM agreed to sell and transfer 560,000,000 common shares, representing 37.33% ownership interest of the Company in favor of MENLO. On February 20, 2018, the Subcommittee on Oversight (Legislative Franchise) (the "Subcommittee") of the House of Representatives conducted a public hearing on the alleged sale of the Company's ownership interest to MENLO without Congressional approval. Pursuant to Section 14 of RA No. 10894, a franchise grantee shall not sell its controlling interest without the prior approval of the Congress of the Philippines.

The Company submitted a Position Paper on March 7, 2018 followed by a Supplemental Position Paper on March 21, 2018 to clarify all concerns on the compliance by the Company of the provisions of its franchise. As at the date of the approval of these financial statements, the Company has yet to receive any response or resolution from the Subcommittee on Oversight (Legislative Franchise). Considering the facts and the applicable laws involved in this inquiry, the management, in consultation with its legal counsel, has assessed that this matter will be resolved favorably and will not have an impact on the Company's operations.

Licenses with the National Telecommunications Commission (NTC)

The Company has various Certificates of Public Convenience and Necessities (CPCNs) granted by the NTC which enable the Company to (a) provide data communications (Datacom) services, (b) implement its expansion and improvement programs covering among others the installation, operation, and maintenance of an integrated digital network in the National Capital Region (NCR), and (c) install, operate and maintain a national packet data network with the accompanying authority to charge rates for said services.

Aside from the NTC-authorized Datacom services, the Company was granted a CPCN that enables the Company to participate in the government's liberalization of the telecommunications industry as mandated under Executive Order (EO) No. 109. While beforehand the Company was already operating as an inter-exchange carrier pursuant to the NTC Case No. 90-129 which enabled the Company to provide inter-exchange trunk facilities to connect with local exchange carriers (LEC) and public calling offices for long distance toll service, the said EO 109 thereafter enabled the Company to become a LEC operator authorized under NTC Case No. 94-022. As a LEC operator, the Company was granted Region IV-A comprising of the provinces of Aurora, Laguna, Marinduque, Quezon, Rizal, and Romblon for LEC services. The Company, along with its related party, Capitol Wireless, Inc. (CWI), has been granted the CPCN to establish, operate and maintain international gateway facilities to/from foreign countries as authorized under NTC Case Nos. 93-144 and 94-022.

The Company also has ongoing applications with the NTC to upgrade its existing CPCNs for additional service areas to complement the Company's plan of nationwide network rollout. As at the date of the approval of these financial statements, these applications are still pending with the NTC.

The Company is also registered as a value-added service (VAS) provider with the NTC which allows the Company to offer internet access service; virtual private network, electronic mail service, messaging services, web hosting, electronic commerce, firewall service, e-learning, business application, network security, business resiliency, and data analytics. The Company's VAS license is valid until September 5, 2026.

Status of the Shares Listing in the Philippine Stock Exchange (PSE)

On January 10, 1990, the Company listed its common shares in the PSE. On December 10, 2004, the Company requested the voluntary suspension of the trading of its shares which was approved by the PSE on December 13, 2004. The Company, however, continues to comply with the reportorial requirements of the SEC, the PSE, and the Bureau of Internal Revenue (BIR).

In 2017, the Company requested for the lifting of the voluntary suspension of the trading of its shares with the PSE. Accordingly, the Company submitted an Amended Registration Statement and other required reports to the Markets and Securities Regulation Department (MSRD) of the SEC.

After the Company's full compliance with the SEC requirements, the Company Registration and Monitoring Department of the SEC issued a certification relating to the Company's good standing with the SEC on April 29, 2021. Subsequently, the MSRDC issued an Order dated August 4, 2021, lifting the suspension of the Company's Registration Statement.

The Company continues to update the PSE on its implementation of the Corp Rehab Plan as it evaluates the request for the lifting of the voluntary suspension of the trading of its shares. As at the date of the approval of these financial statements, the result of the said evaluation is still pending with the PSE.

Status of Corporate Rehabilitation

On August 20, 2009, the Company, RETELCOM, Philippine Wireless, Inc. (PWI), CWI, and Wavenet Philippines, Inc. (WPI) collectively referred to as the "RETELCOM Group" jointly filed a petition for Corporate Rehabilitation (Corp Rehab) and Suspension of Payments pursuant to the *Rules of Procedure on Corporate Rehabilitation* (A.M. No. 00-8-10-SC). On August 24, 2009, the rehabilitation court (Rehab Court) issued an order staying enforcement of all claims, whether for money or otherwise against the RETELCOM Group (Stay Order) and appointing a rehabilitation receiver (Rehab Receiver).

On April 1, 2011, the Rehab Court approved the RETELCOM Group's Corp Rehab Plan which was immediately executory. However, during the same year, certain creditors whose claims constitute a minority of the Company's total liabilities, filed before the Court of Appeals (CA) a petition assailing the Rehab Court's approval of the Corp Rehab Plan. On May 19, 2017, the CA rendered a decision reversing the Rehab Court's approval of the Company's Corp Rehab Plan. On December 4, 2017, the RETELCOM Group filed a Petition for Review before the Supreme Court (SC). The result of the said review, however, is still pending with the SC as at the date of these financial statements.

On July 27, 2018, the Company requested the Rehab Court that it be allowed to exit from rehabilitation subject to certain requirements which was approved by the Rehab Court on August 6, 2018. These requirements include, among others, the increase of the authorized capital stock which will allow the Company to settle its liabilities through debt-to-equity conversion as mandated by the approved Corp Rehab Plan.

On November 3, 2023, the SEC approved the Company's increase in authorized capital stock to accommodate the debt-to-equity conversion of deposits for future stock subscriptions amounting to ₱8,709.6 million in accordance with the Corp Rehab Plan (see Note 13) and partially settled its statutory obligations, salaries, wages and other employee benefits out of its escrow accounts as at December 31, 2023 (see Note 10).

Under the Corp Rehab Plan, however, the Company still has to request for a temporary exemptive relief from the SEC under the Securities Regulation Code (SRC) Rule 72.2, and the PSE to lift the suspension of the trading of the Company's common shares, without any sanctions or penalties, and for the Company to comply with all the applicable rules and regulations of the SEC and PSE so that the trading of all the authorized shares of the Company shall not in any way be suspended or restricted except as provided by law. Moreover, the Company has to enroll and list all its authorized redeemable shares as freely "tradable" shares with the PSE.

In the meantime, any sale or disposition of the petitioner's properties, whether real or personal, is subject to the Rehab Court's evaluation and approval, and all unpaid obligations to claimants covered by the Corp Rehab Plan are subject to legal interest of 6% from the approval of the Corp Rehab Plan until full payment (see Note 10).

Status of Operations

The Company has incurred a deficit of ₱11,646.7 million and ₱11,665.0 million as at December 31, 2024 and 2023, respectively, and is still under Corp Rehab. These factors indicate a material uncertainty which may cast doubt on the Company's ability to continue as a going concern.

However, the Company has a positive equity of ₱62.4 million and ₱37.3 million as at December 31, 2024 and 2023, respectively (see Note 13). The Company also partially paid its statutory obligations, salaries, wages and other employee benefits using its escrow accounts as at December 31, 2024 and 2023. As of date, the Company is in the process of complying with all the directives in its Corp Rehab Plan and the management is optimistic to complete the same and exit the Corp Rehab in April 2025.

To further improve its financial position, sustain operations, and exit from the Corp Rehab status, the Company is expanding its digital infrastructure network and diversifying its service offerings through a combination of own build and strategic partnerships.

To expand its fiber footprint, achieve incremental connectivity targets and reduce maintenance costs, the Company also completed notable infrastructure projects such as, node and building ports utilization, fiber upgrade, and pole attachments and access cable rehabilitation (see Note 7).

In December 2023, the BOD approved the Company's plan to upgrade its existing CPCNs and apply for additional service areas with the NTC to support the Company's expected nationwide network roll-out. The Company engaged the services of one of the world's largest financial advisory group to raise the necessary funds for the network expansion and roll-out.

Joint Venture (JV) Agreement

On August 6, 2024, the Company entered into a JV agreement with Netlinkz Global Services (Aust & NZ) PTY Limited, a company organized and existing under the laws of Australia, to form a joint venture company in the Philippines. On November 27, 2024, a separate vehicle was incorporated under the operating name of SecureLink Networks Incorporated (SecureLink). The authorized capital stock shall be the Philippine Peso equivalent of USD 475,000 or ₱26.7 million, divided into ₱1.00 par value a share.

Under the JV agreement, the Company will own 51% equity ownership of the joint venture in exchange for service, property and other operating expenses during the operational transition period equivalent to ₱13.6 million or USD 242,000. Netlinkz Global Services (Aust & NZ) PTY Limited, on the other hand, will own 49% equity ownership for a cash consideration of ₱13.1 million or USD 233,000. The Company will account for its investment in SecureLink as investment in a subsidiary. As at the reporting date, the Company has not made any capital contribution yet to the joint venture.

SecureLink will operate and distribute Starlink satellite internet equipment and services. This joint venture will serve as the Philippines' hub for Netlinkz' cutting-edge products, featuring the advanced Virtual Secured Network Plus (VSN+). Additionally, it will leverage on the availability of broadband connectivity provided by smaller, portable and mobile satellite dishes offering broadband internet to previously inaccessible regions. Through this partnership, enterprises throughout the country, particularly in areas historically underserved by traditional fibre internet providers, will gain access to this high-speed, low-latency connectivity with enterprise grade network security. The Company will offer Starlink services which includes, the Starlink kit, enterprise solutions for fixed broadband services, mobile application, maritime and data volume-based services. The joint venture will expand and solidify the market base for Starlink services in the Philippines.

Approval of the Financial Statements

The financial statements as at and for the years ended December 31, 2024 and 2023 (with comparative figures for 2022) were approved and authorized for issue by the BOD, as approved and endorsed by the Audit Committee, on April 11, 2025.

2. Summary of Material Accounting Policy Information

Basis of Preparation and Statement of Compliance

The financial statements have been prepared in accordance with the Philippine Financial Reporting Standards (PFRS) Accounting Standards issued and approved by the Financial and Sustainability Reporting Standards Council and adopted by the SEC, including SEC pronouncements. This financial reporting framework includes PFRS, Philippine Accounting Standards (PAS) and Philippine Interpretations from International Financial Reporting Interpretations Committee (IFRIC).

Measurement Bases

The financial statements are presented in Philippine Peso (Peso), which is the Company's functional currency. All values are stated in absolute amounts, except when indicated.

The financial statements of the Company have been prepared on the historical cost basis, except for the following accounts:

- land measured at revalued amount;
- investment in equity securities measured at fair value;
- lease liabilities initially measured at the present value of future lease payments; and
- retirement benefit liabilities measured at the present value of estimated future cash outflows.

Historical cost is generally based on the fair value of the consideration given in exchange for an asset or the fair value of the consideration received in exchange for incurring a liability. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The Company uses market observable data to a possible extent when measuring the fair value of an asset or a liability. Fair values are categorized into different levels in a fair value hierarchy based on inputs used in the valuation techniques as follows:

- Level 1 - Quoted (unadjusted) market prices in active market for identical assets or liabilities;
- Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable; and
- Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

If the inputs used to measure the fair value of an asset or a liability might be categorized in different levels of the fair value hierarchy, then the fair value measurement is categorized in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement.

The Company recognizes transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred.

Further information about the assumptions made in measuring fair value is included in Note 23, *Financial Instruments*.

Adoption of Amendments to PFRS Accounting Standards

The material accounting policies adopted are consistent with those of the previous financial year, except for the adoption of the following amendments to PFRS effective January 1, 2024:

- Amendments to PAS 1, *Noncurrent Liabilities with Covenants* – The amendments clarified that covenants to be complied with after the reporting date do not affect the classification of debt as current or noncurrent at the reporting date. Instead, the amendments require the entity to disclose information about these covenants in the notes to the financial statements. The amendments must be applied retrospectively. Earlier application is permitted. If applied in earlier period, the Company shall also apply Amendments to PAS 1 - *Classification of Liabilities as Current or Noncurrent* for that period.

The adoption of the amendments to PFRS Accounting Standards did not materially affect the financial statements of the Company. Additional disclosures were included in the financial statements, as applicable.

Amendments to PFRS Accounting Standards in Issue But Not Yet Effective or Adopted

Relevant amendments to PFRS Accounting Standards, which is not yet effective as at December 31, 2024 and have not been applied in preparing the financial statements, are summarized below:

Effective for annual periods beginning on or after January 1, 2026:

- Amendments to PFRS 9, *Financial Instruments*, and PFRS 7, *Financial Instruments: Disclosures – Classification and Measurement of Financial Assets* – The amendments clarify that a financial liability is derecognized when the related obligation is discharged, cancelled, expires or otherwise qualifies for derecognition (e.g. settlement date), and introduces a policy option to derecognize financial liabilities settled through an electronic payment system before settlement date if the required conditions are met. The amendments also clarify the assessment of contractual cash flow characteristics of financial assets, the treatment of non-recourse loans and contractually linked instruments, as well as require additional disclosure requirements for financial assets and liabilities with contingent features and equity instruments classified at fair value through other comprehensive income (FVOCI). Earlier application is permitted.
- Annual Improvements to PFRS Accounting Standards Volume 11 -
 - Amendments to PFRS 9, *Financial Instruments – Transaction Price and Lessee Derecognition of Lease Liabilities* – The amendments clarify that when a lessee has determined that a lease liability has been extinguished in accordance with PFRS 9, the lessee must apply the derecognition criteria for a financial liability which requires recognition of a gain or loss in profit or loss. The amendments also replace the reference to ‘*transaction price as defined by PFRS 15, Revenue from Contracts with Customers*’ to ‘*the amount determined by applying PFRS 15*’ to remove potential confusion. Earlier application is permitted.

Effective for annual periods beginning on or after January 1, 2027 -

- PFRS 18, *Presentation and Disclosure in Financial Statements* – This standard replaces PAS 1, *Presentation of Financial Statements*, and sets out the requirements for the presentation and disclosure of information to help ensure that the financial statements provide relevant information that faithfully represents the entity's assets, liabilities, equity, income and expenses. The standard introduces new categories and sub-totals in the statements of comprehensive income, disclosures on management-defined performance measures, and new principles for grouping of information, which the entity needs to apply retrospectively. Earlier application is permitted.

Under prevailing circumstances, the adoption of the foregoing amendment to PFRS Accounting Standards is not expected to have any material effect on the financial statements. Additional disclosures will be included in the financial statements, as applicable.

Financial Assets and Liabilities

Date of Recognition. The Company recognizes a financial asset or a financial liability in the statement of financial position when it becomes a party to the contractual provisions of a financial instrument.

Initial Recognition and Measurement. Financial instruments are recognized initially at fair value, which is the fair value of the consideration given (in case of an asset) or received (in case of a liability). The initial measurement of financial instruments, except for those designated at fair value through profit or loss (FVPL), includes transaction cost.

"Day 1" Difference. Where the transaction price in a non-active market is different from the fair value of other observable current market transactions in the same instrument or based on a valuation technique whose variables include only data from observable market, the Company recognizes the difference between the transaction price and fair value (a "Day 1" difference) in profit or loss. In cases where there is no observable data on inception, the Company deems the transaction price as the best estimate of fair value and recognizes "Day 1" difference in profit or loss when the inputs become observable or when the instrument is derecognized. For each transaction, the Company determines the appropriate method of recognizing the "Day 1" difference.

Financial Assets

In the case of a regular way purchase or sale of financial assets, recognition and derecognition, as applicable, is done using settlement date accounting.

Classification. The Company classifies its financial assets at initial recognition under the following categories: (a) financial assets at FVPL, (b) financial assets at amortized cost and (c) financial assets at fair value through other comprehensive income (FVOCI). The classification of a financial instrument largely depends on the Company's business model and its contractual cash flow characteristics.

The Company's does not have financial assets measured at FVPL. As at December 31, 2024 and 2023, the Company's investment in equity shares was classified as financial asset at FVOCI.

Financial Assets at Amortized Cost. Financial assets shall be measured at amortized cost if both of the following conditions are met:

- the financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows; and

- the contractual terms of the financial asset give rise, on specified dates, to cash flows that are solely payments of principal and interest on the principal amount outstanding.

After initial recognition, financial assets at amortized cost are subsequently measured at amortized cost using the effective interest method, less allowance for impairment, if any. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees that are an integral part of the effective interest rate. Gains and losses are recognized in profit or loss when the financial assets are derecognized and through amortization process. Financial assets at amortized cost are included under current assets if realizability or collectability is within 12 months after the reporting period. Otherwise, these are classified as noncurrent assets.

This category includes cash, receivables (excluding contract asset and advances to suppliers), due from related parties and refundable security deposits (see Notes 4, 5, 6 and 19).

Financial Asset at FVOCI. Financial asset at FVOCI which are not held for trading may be irrevocably designated at initial recognition under the FVOCI category.

Financial assets at FVOCI are initially measured at fair value plus transaction costs. After initial recognition, financial assets at FVOCI are measured at fair value with unrealized gains or losses recognized under “Other comprehensive income” account in the equity section of the statements of financial position.

These fair value changes are recognized in equity and are not reclassified to profit or loss in subsequent periods. On disposal of these equity securities, any cumulative valuation gains or losses will be reclassified to retained earnings. Dividends earned on these equity securities are recognized in profit or loss upon declaration.

Classified under this category is the investment in shares which is being traded in the PSE (see Note 6).

Impairment. The Company recognizes an allowance for expected credit loss (ECL) for all debt instruments not measured at FVPL. Expected credit loss is based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Company expects to receive. The difference is then discounted at an approximation to the asset’s original effective interest rate. The expected cash flows will include cash flow from the sale of collateral held or other credit enhancements that are integral to the contractual terms.

For trade receivables and contract assets, the Company has applied the simplified approach in measuring ECL. Simplified approach requires that ECL should always be based on the lifetime expected credit losses. The Company has established a provision matrix that is based on its historical credit loss experience, adjusted for forward-looking factors specific to the debtors and the economic environment and an assessment of both the current as well as the forecast direction of conditions at the reporting date, including time value of money where appropriate.

For other financial assets at amortized cost, the Company applies the general approach in measuring the expected credit losses. The Company assessed that cash are deposited with reputable counterparty banks that possess good credit ratings. For notes and other receivables, the Company considered the financial capacity of the debtor to pay when the credit becomes due and demandable. For security deposits, the Company considered the financial capacity of the counterparties to refund the deposits once the agreement has been terminated.

The Company considers a financial asset in default when internal or external information indicates that the Company is unlikely to receive the outstanding contractual amounts in full before taking into account any credit enhancements held by the Company. A financial asset is written off when there are no reasonable expectations of recovering the contractual cash flows.

The Company re-assesses the ECL on financial assets at amortized cost every reporting date.

Reclassification. The Company reclassifies its financial assets when, and only when, it changes its business model for managing those financial assets. The reclassification is applied prospectively from the first day of the first reporting period following the change in the business model (reclassification date).

For a financial asset reclassified out of the financial assets at amortized cost category to financial assets at FVPL, any gain or loss arising from the difference between the previous amortized cost of the financial asset and fair value is recognized in profit or loss.

For a financial asset reclassified out of the financial assets at amortized cost category to financial assets at FVOCI, any gain or loss arising from a difference between the previous amortized cost of the financial asset and fair value is recognized in OCI.

For a financial asset reclassified out of the financial assets at FVOCI category to financial assets at amortized cost, any gain or loss previously recognized in OCI, and any difference between the new amortized cost and maturity amount, are amortized to profit or loss over the remaining life of the investment using the effective interest method. If the financial asset is subsequently impaired, any gain or loss that has been recognized in OCI is reclassified from equity to profit or loss.

In the case of a financial asset that does not have a fixed maturity, the gain or loss shall be recognized in profit or loss when the financial asset is sold or disposed. If the financial asset is subsequently impaired, any previous gain or loss that has been recognized in OCI is reclassified from equity to profit or loss.

For a financial asset reclassified out of the financial assets at FVOCI category to financial assets at FVPL, the cumulative gain or loss previously recognized in OCI is reclassified from equity to profit or loss as a reclassification adjustment at the reclassification date.

Derecognition. A financial asset (or where applicable, a part of a financial asset or part of a group of similar financial assets) is derecognized when:

- the right to receive cash flows from the asset has expired;
- the Company retains the right to receive cash flows from the financial asset, but has assumed an obligation to pay them in full without material delay to a third party under a “pass-through” arrangement; or
- the Company has transferred its right to receive cash flows from the financial asset and either (a) has transferred substantially all the risks and rewards of the asset, or (b) has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Company has transferred its right to receive cash flows from a financial asset or has entered into a pass-through arrangement and has neither transferred nor retained substantially all the risks and rewards of ownership of the financial asset nor transferred control of the financial asset, the financial asset is recognized to the extent of the Company's continuing involvement in the financial asset. Continuing involvement that takes the form of a guarantee over the transferred financial asset is measured at the lower of the original carrying amount of the financial asset and the maximum amount of consideration that the Company could be required to repay.

Financial Liabilities

Classification. The Company classifies its financial liabilities at initial recognition under the following categories: (a) financial liabilities at amortized cost, (b) financial liabilities at FVPL.

As at reporting date, the Company does not have financial liabilities measured at FVPL.

Financial Liabilities at Amortized Cost. Financial liabilities are categorized as financial liabilities at amortized cost when the substance of the contractual arrangement results in the Company having an obligation either to deliver cash or another financial asset to the holder, or to settle the obligation other than by the exchange of a fixed amount of cash or another financial asset for a fixed number of its own equity instruments.

These financial liabilities are initially recognized at fair value less any directly attributable transaction costs. After initial recognition, these financial liabilities are subsequently measured at amortized cost using the effective interest method. Amortized cost is calculated by taking into account any discount or premium on the issue and fees that are an integral part of the effective interest rate.

Gains and losses are recognized in profit or loss when the liabilities are derecognized or through the amortization process.

This category includes trade and other payables (excluding nonrefundable other payables), loans payable, due to related parties and lease liabilities (see Notes 9, 11, 19 and 20).

Derecognition. A financial liability is derecognized when the obligation under the liability is discharged, cancelled or has expired. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognized in the statement of comprehensive income.

Offsetting of Financial Assets and Liabilities

Financial assets and financial liabilities are offset and the net amount is reported in the statement of financial position if, and only if, there is a currently enforceable legal right to offset the recognized amounts and there is intention to settle on a net basis, or to realize the asset and settle the liability simultaneously. This is not generally the case with master netting agreements, and the related assets and liabilities are presented gross in the statement of financial position.

Classification of Financial Instrument between Liability and Equity

A financial instrument is classified as liability if it provides for a contractual obligation to:

- Deliver cash or another financial asset to another entity;
- Exchange financial assets or financial liabilities with another entity under conditions that are potentially unfavorable to the Company; or
- Satisfy the obligation other than by the exchange of a fixed amount of cash or another financial asset for a fixed number of own equity shares.

If the Company does not have an unconditional right to avoid delivering cash or another financial asset to settle its contractual obligation, the obligation meets the definition of a financial liability.

Contract Balances

Contract Assets. A contract asset represents the Company's right to consideration in exchange for goods or services that the Company has transferred to a customer when that right is conditioned on something other than a passage of time. Contract assets are reclassified to trade receivables when payment from the customers becomes due.

Contract Liabilities. A contract liability represents the Company's obligation to transfer goods to a customer for which the Company has received consideration from the customer. Contract liabilities are recognized as revenue when the Company performs its obligations under the contract.

Property and Equipment

Property and equipment (except land) are stated at cost less accumulated depreciation, and any accumulated impairment in value. Cost includes expenditures that are directly attributable to bringing the property and equipment to the location and condition necessary for it to be capable of operating in the manner intended by the management.

Expenditures incurred after the property and equipment have been put into operation, such as repairs, maintenance and overhaul costs, are normally recognized in profit or loss in the year the costs are incurred. In situations where it can be clearly demonstrated that the expenditures have resulted in an increase in the future economic benefits expected to be obtained from the use of an item of property and equipment beyond its originally assessed standard of performance, the expenditures are capitalized as additional costs of property and equipment. The cost of replacing a component of an item of property and equipment is recognized if it is probable that the future economic benefits embodied within the component will flow to the Company, and its cost can be measured reliably. The carrying amount of the replaced component is derecognized.

Land is initially recognized at cost. Subsequent to initial recognition, land is measured at revalued amounts, which represent fair value at date of revaluation less any accumulated impairment in value.

Valuations are performed frequently enough to ensure that the fair value of a revalued property and equipment does not significantly differ from its carrying value. The increase of the carrying value of the land as result of a revaluation is credited directly to other comprehensive income under "revaluation surplus" account, unless it reverses a revaluation decrease previously recognized as an expense, in which case it is credited in profit or loss. A revaluation decrease is charged directly against any related revaluation surplus, with any excess being recognized as an expense in profit or loss.

Depreciation is calculated on a straight-line basis over the estimated useful lives of the property and equipment. The useful life of each of the Company's property and equipment is estimated based on the period over which the asset is expected to be available for use. Such estimation is based on a collective assessment of industry practice and experience with similar assets.

Estimated useful lives of the Company's property and equipment are as follows:

	Number of Years
Buildings and improvements	25
Telecommunications equipment:	
Cable and wire facilities	14
Network equipment	5
Other work equipment	5

The carrying amounts of the assets are reviewed for impairment when events or changes in circumstances indicate that the carrying amount may not be recoverable.

The assets' useful lives and depreciation method are reviewed periodically, and adjusted if appropriate, at each reporting year-end.

Fully-depreciated assets are retained as property and equipment until these are no longer in use.

An item is derecognized upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the item) is recognized in profit or loss in the year the item is derecognized.

Investment Properties

Investment properties are carried at cost less any impairment in value. When the investment properties are sold or retired, the cost less any impairment in value are eliminated from the accounts and any resulting gain or loss is recognized in profit or loss.

The carrying amounts of investment properties are reviewed for impairment when events or changes in circumstances indicate that the carrying amount may not be recoverable.

Transfers are made to investment property when, and only when, there is a change in use, evidenced by ending of owner-occupation or commencement of an operating lease to another party. Transfers are made from investment property when, and only when, there is a change in use, evidenced by commencement of owner-occupation or commencement of development with a view to sale.

For a transfer from investment property to owner-occupied property, the deemed cost of property for subsequent accounting is its carrying amount at the date of change in use. If the property occupied by the Company as an owner-occupied property becomes an investment property, the Company accounts for such property in accordance with the policy stated under property and equipment up to the date of change in use.

Investment properties are derecognized when either they have been disposed of or when permanently withdrawn from use and no future economic benefit expected from the disposal. Any gains or losses on the retirement or disposal of an investment property are recognized in profit or loss in the year of retirement or disposal.

Other Assets

Creditable Withholding Tax (CWT). CWT represents the amount withheld by the Company's customers in relation to its income. CWT is deducted from income tax payable in the same year the revenue was recognized. CWT in excess of income tax payable are carried forward to the succeeding year.

Prepayments. Prepayments are expenses paid in advance and recorded as an asset before these are utilized. These are carried at cost and are amortized on a straight-line basis over the period of expected usage, which is equal to or less than twelve months or within the normal operating cycle. Prepayments are classified as current asset when the cost of goods or services related to the prepayment are expected to be incurred within one year or the Company's normal operating cycle, whichever is longer. Otherwise, these are classified as noncurrent assets.

Advances to Suppliers. Advances to suppliers are recognized at cost. These are non-refundable down payment made for future acquisition of capital asset which will be applied as part of payments upon execution of sale.

Plant Supplies. Plant supplies are stated at cost less accumulated impairment in value, if any. Cost of plant supplies comprise all costs of purchase and other costs incurred in bringing the plant supplies to their present location and condition. A regular review is undertaken to determine the extent of any provision for obsolescence. The Company provides allowance for impairment losses when the asset becomes obsolete.

Deposit. Deposit is recognized at cost. This is a non-refundable down payment made for future acquisition of capital asset which will be applied as part of payments upon execution of sale.

Software and Licenses. Software and licenses are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortization and accumulated impairment losses. Amortization is recognized on a straight-line basis over their estimated useful lives, which does not exceed five (5) years.

Software and licenses with finite lives are amortized over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortization period and the amortization method for an intangible asset with a finite useful life are reviewed at least at the end of each reporting period. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are considered to modify the amortization period or method, as appropriate, and are treated as changes in accounting estimates. The amortization expense on intangible assets with finite lives is recognized in the profit or loss in the expense category that is consistent with the function of the intangible assets.

Software and licenses are derecognized upon disposal (i.e., at the date the recipient obtains control) or when no future economic benefits are expected from its use or disposal. Any gain or loss arising upon derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying value of the asset) is included in the profit or loss.

Impairment of Nonfinancial Assets

The Company assesses at each reporting date whether there is an indication of impairment. If any such indication exists, or when annual impairment testing for an asset is required, the Company makes an estimate of the asset's recoverable amount. Recoverable amount is the higher of an asset's or cash-generating unit's fair value less costs to sell and its value in use, and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or group of assets. Where the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessment of the time value of money and the risks specific to the asset. Any impairment loss is recognized in profit or loss.

An assessment is made at each reporting date as to whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. If such indication exists, the recoverable amount is estimated. A previously recognized impairment loss is reversed only if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognized. If that is the case, the carrying amount of the asset is increased to its recoverable amount to the extent of the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognized for the asset in prior years. Such reversal is recognized in profit or loss. After such a reversal, the depreciation charge is adjusted in future periods to allocate the asset's revised carrying amount, less any residual value, on a systematic basis over its remaining useful life.

Deposits for Future Stock Subscriptions

Deposits for future stock subscriptions represent funds received from existing and/or prospective stockholders or liabilities converted by the Company to be applied as payment for stock subscriptions on unissued shares or shares from the increase in authorized capital stock.

Under Financial Reporting Bulletin No. 6 as issued by the Philippine SEC, the Company shall classify a contract to deliver its own equity instruments under equity as a separate account from outstanding capital stock, if and only if, all of the following elements are present as at reporting date:

- a. The unissued authorized capital stock of the entity is insufficient to cover the amount of shares indicated in the contract;
- b. There is BOD and stockholders approval on the proposed increase in the authorized capital stock (for which a deposit was received by the corporation);
- c. There is stockholders' approval of the proposed increase; and
- d. The application for the approval of the proposed increase has been filed with the Philippine SEC.

If the above conditions are not met, the "Deposits for future stock subscription" is presented as a noncurrent liability.

Equity

Preferred Stock. Preferred stock is classified as equity if it is non-redeemable, or redeemable only at the option of the Company, and any dividends are discretionary at the option of the Company. Dividends thereon are recognized as distributions upon approval by the BOD of the Company.

Common Stock. Common stock is measured at par value of the issued and outstanding common shares.

Additional Paid-in Capital (APIC). APIC represents proceeds and/or fair value of considerations received in excess of par value of the issued shares. Transaction costs directly attributable to the issuances of capital stock are recognized as a deduction from APIC.

Deficit

Deficit represents the accumulated results of operations of the Company.

Other Comprehensive Income (Loss)

Other comprehensive income (loss) comprises items of income and expenses (including items previously presented under the statement of changes in equity) that are not recognized in profit or loss for the year. This pertains to the revaluation surplus, cumulative remeasurement gains on retirement benefits liability and cumulative unrealized losses on financial asset at FVOCI.

Earnings (Loss) Per Share

Basic. Basic earnings (loss) per share is calculated by dividing the net income (loss) attributable to ordinary stockholders of the Company by the weighted average number of common shares outstanding during the year, excluding common shares purchased by the Company and held as treasury shares.

Diluted. Diluted earnings (loss) per share is calculated by dividing the net income (loss) attributable to ordinary stockholders of the company by the weighted average number of common shares outstanding, adjusted for any stock dividends declared during the year plus weighted average number of ordinary shares that would be issued on the conversion of all potentially dilutive common shares during the period.

Revenue Recognition

Revenue from Contract with Customers

Revenue from contract with customers is recognized when the performance obligation in the contract has been satisfied, either at a point in time or over time. Revenue is recognized over time if one of the following criteria is met: (a) the customer simultaneously receives and consumes the benefits as the Company perform its obligations; (b) the Company's performance creates or enhances an asset that the customer controls as the asset is created or enhanced; or (c) the Company's performance does not create an asset with an alternative use to the Company and the Company has an enforceable right to payment for performance completed to date. Otherwise, revenue is recognized at a point in time.

The Company also assesses its revenue arrangements to determine if it is acting as a principal or as an agent. The Company has assessed that it acts as a principal in all of its revenue sources.

The Company's revenue from contracts with customers generally include broadband internet access service contracts which are either offered separately or bundled with other services, information technology services and other services.

Broadband internet access services ranging from shared access to fully redundant (first to last mile) high availability service. These include fiber optic dedicated internet, e-line or shared broadband internet, wireless dedicated or shared broadband access and customized and value-added services.

Services may be rendered separately or bundled with other services. The specific recognition criteria are as follows:

Service arrangements may include fixed monthly charges (including excess of consumable fixed monthly service fees) generated from fixed line and other network services primarily through broadband and leased line services, which the Company recognizes on a straight-line basis over the customer's subscription period. Services provided to customers are billed throughout the month according to the billing cycles. Services availed by customers in addition to these fixed fee arrangements are charged separately at their stand-alone selling prices and recognized as the additional service is provided or as availed by the customers.

Installation fees for services are not capable of being distinct from the sale of modem since the customer obtains benefit from the combined output of the installation services and the device and is recognized upon delivery of the modem and performance of modem installation. The related incremental costs are recognized in the same manner in profit or loss.

Revenues from shared lines or shared access are recognized net of content provider's share in revenue. Revenue is recognized upon service availment. Revenue from server hosting, co-location services, and customer support services are recognized at point in time as the services are performed.

Upon signing of subscription agreement, customers are required to make payments equivalent to two (2) months advance and one (1) month deposit of internet broadband monthly subscription fee. These customers' deposits are refundable and/or to be applied to unpaid receivables of the customers. The Company recognized these advance payments and deposit as contract liability and "Customers' deposits" as part of liabilities.

The Company also provides IT services and products from IT infrastructure, applications, network security, and others.

Revenue from sale of IT infrastructure is recognized at the point in time when control of the asset is transferred to the customer, generally upon delivery of the equipment or software at the customer's location. Revenue from services is recognized when the service to the customer is performed, generally via milestone achievement.

Other Sources of Revenue

The following specific recognition criteria must be met before revenue is recognized:

Rental Income. Rent income is recognized on a straight-line basis over the term of the lease. The Company does not provide any ancillary services to the tenants of the investment property. The lease payments therefore relate entirely to rental and are recognized as rent income. It was not necessary to separate the considerations between lease and non-lease components on the adoption of PFRS Accounting Standards 15.

Other Income. Other income is recognized when there is an incidental economic benefit that will flow to the Company through an increase in asset or reduction in liability and that can be measured reliably.

Cost and Expenses Recognition

Costs and expenses are recognized in profit or loss when a decrease in future economic benefits related to a decrease in an asset or an increase in a liability, other than distributions to equity participants, has arisen that can be measured reliably.

Cost of Services. Cost of services are direct costs incurred in relation to broadband services and installation of software licenses. These are recognized as the services are rendered.

Cost of Sales. Cost of sales mainly pertains to purchases of software licenses. These are generally recognized when related goods are sold.

General and Administrative Expenses. General and administrative expenses constitute costs of administering the business and costs incurred to sell and market the services. These are expensed as incurred.

Interest Expense. Interest expense arising from borrowed funds are recognized in profit or loss using the effective interest method.

Employee Benefits

Short-term Benefits. Short-term employee benefits are expensed as the related service is provided. A liability is recognized for the amount expected to be paid if the Company has a present legal or constructive obligation to pay this amount as a result of past service provided by the employees and the obligation can be estimated reliably.

Retirement Benefits. The Company has a noncontributory defined benefit plan covering all regular and permanent employees. The retirement liability is determined using the projected unit credit method which reflects services rendered by employees to the date of valuation and incorporates assumptions concerning employees' projected salaries.

The Company recognizes service costs, comprising of current service costs and interest costs in profit or loss.

Current service costs pertain to the increase in the present value of a defined benefit obligation resulting from employee service in the current period.

Interest on the retirement liability is the change during the period in the retirement liability that arises from the passage of time which is determined by applying the discount rate based on government bonds to the retirement liability. Interest is calculated by applying the discount rate to the retirement liability.

Remeasurements comprising actuarial gains and losses are recognized immediately in OCI in the period in which they arise. Remeasurements are not reclassified to profit or loss in subsequent periods.

The present value of the defined benefit liability is determined by discounting the estimated future cash outflows using interest rate on government bonds that have terms to maturity approximating the terms of the related retirement liability.

Actuarial valuations are made with sufficient regularity that the amounts recognized in the financial statements do not differ materially from the amounts that would be determined at the reporting date.

Leases

The Company assesses whether the contract is, or contains, a lease. To assess whether a contract conveys the right to control the use of an identified assets for a period of time, the Company assesses whether, throughout the period of use, it has both of the following:

- i. the right to obtain substantially all of the economic benefits from the use of the identified asset; and
- ii. the right to direct the use of the identified asset.

If the Company has the right to control the use of an identified asset for only a portion of the term of the contract, the contract contains a lease for that portion of the term. The Company also assesses whether a contract contains a lease for each potential separate lease component.

The Company as a Lessee. At the commencement date, the Company recognizes right-of-use (ROU) assets and lease liabilities for all leases, except for leases with lease terms of 12 months or less (short-term leases) and leases for which the underlying asset is of low value, in which case the lease payments associated with those leases are recognized as an expense in profit or loss on a straight-line basis.

For leases with lease terms of 12 months or less but with an option to extend the lease, the management assesses whether there is reasonable certainty that the Company will extend the lease, by considering all relevant facts and circumstances that create an economic incentive for the lessee to extend or terminate the lease, to determine the appropriate lease term.

ROU Assets. At commencement date, the Company measures ROU assets at cost, which are comprised of the following:

- the amount of the initial measurement of lease liabilities;
- any lease payments made at or before the commencement date less any lease incentives received;
- any initial direct costs; and
- an estimation of costs to be incurred by the Company in dismantling and removing the underlying asset, when applicable.

After the commencement date, the ROU assets are carried at cost less any accumulated amortization and accumulated impairment losses, and adjusted for any remeasurement of the related lease liabilities. The ROU assets are amortized over the shorter of the lease terms or the useful lives of the underlying assets.

Lease Liabilities. At commencement date, the Company measures a lease liability at the present value of future lease payments using the interest rate implicit in the lease, if that rate can be readily determined. Otherwise, the Company uses its incremental borrowing rate.

Lease payments included in the measurement of a lease liability consist of the following:

- fixed payments, including in-substance fixed payments;
- variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date;
- amounts expected to be payable by the lessee under residual value guarantees; and

- the exercise price under a purchase option that the Company is reasonably certain to exercise; lease payments in an optional renewal period if the Company is reasonably certain to exercise an extension option; and penalties for early termination of a lease unless the Company is reasonably certain not to terminate early.

A lease liability is subsequently measured at amortized cost. Interest on the lease liability and any variable lease payments not included in the measurement of lease liability are recognized in profit or loss unless these are capitalized as costs of another asset. Variable lease payments not included in the measurement of the lease liability are recognized in profit or loss when the event or condition that triggers those payments occurs.

If there is a change in the lease term or if there is a change in the assessment of an option to purchase the underlying asset, the lease liability is remeasured using a revised discount rate considering the revised lease payments on the basis of the revised lease term or reflecting the change in amounts payable under the purchase option. The lease liability is also remeasured using the revised lease payments if there is a change in the amounts expected to be payable under a residual value guarantee or a change in future lease payments resulting from a change in an index or a rate used to determine those payments.

The Company as a Lessor. Leases where the Company retains substantially all the risks and benefits of ownership of the asset are classified as operating leases. Initial direct costs incurred in negotiating an operating lease are added to the carrying amount of the leased asset and recognized on a straight-line basis over the lease term on the same basis as rental income. Contingent rents are recognized as revenue in the period in which these are earned.

Income Taxes

Current Tax. Current tax assets and liabilities for the current period are measured at the amount expected to be recovered from or paid to the taxation authority. The tax rates and tax laws used to compute the amount are those that are enacted or substantially enacted at the end of the reporting period.

Deferred Tax. Deferred tax is provided on temporary differences at the end of the reporting period between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes. Deferred tax assets are recognized for all deductible temporary differences, net operating loss carryover (NOLCO) and excess of minimum corporate income tax (MCIT) over regular corporate income tax (RCIT) to the extent probable that there will be a taxable profit against which deductible temporary differences can be utilized, whereas deferred tax liabilities and for all taxable temporary differences, except when the deferred tax asset or liability arises from the initial recognition of goodwill or of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting income nor taxable income or loss.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilized. Unrecognized deferred tax assets are reassessed at each reporting date and are recognized to the extent that it has become probable that future taxable profit will allow the deferred tax asset to be recovered. Deferred tax assets and liabilities are measured at tax rates expected to apply to the year when the asset is realized or the liability is settled, based on tax rates and tax laws that have been enacted or substantially enacted at the end of the reporting period.

Income tax relating to items recognized directly in equity is recognized in equity and not in profit or loss.

Deferred tax assets and deferred tax liabilities are offset, if a legally enforceable right exists to offset current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

Value-Added Tax (VAT)

VAT represents the net amount of VAT recoverable from the taxation authority. Revenue, expenses and assets are recognized net of the amount of VAT except:

- where VAT incurred on a purchase of assets or services is not recoverable from the taxation authority, in which case VAT is recognized as part of the cost of acquisition of the asset or as part of the expense item, as applicable; or
- receivables and payables that are stated with the amount of VAT included.

The net amount of VAT payable to the taxation authority is included as part of “Statutory liabilities” account in the statement of financial position.

Deferred Input VAT. Deferred input VAT represents the unamortized amount of input VAT on capital goods and input VAT on the unpaid portion of availed goods and services.

In accordance with Revenue Regulations (RR) No. 16-2005, input VAT on purchases or imports of the Company of capital goods (depreciable assets for income tax purposes) made prior to January 1, 2022 with an aggregate acquisition cost (exclusive of VAT) in each of the calendar months exceeding ₱1.0 million is claimed as credit against output VAT over 60 months or the estimated useful lives of capital goods, whichever is shorter.

Deferred input VAT that is expected to be realized within 12 months after the financial reporting period is classified as current asset. Otherwise, it is classified as noncurrent asset.

Where the aggregate acquisition cost (exclusive of VAT) of the existing or finished depreciable capital goods purchased or imported during any calendar month does not exceed ₱1.0 million or if the purchase was made on or after January 1, 2022, the total input VAT will be allowable as credit against output VAT in the month of acquisition.

Related Party Relationships and Transactions

A related party relationship exists when one party has the ability to control, directly, or indirectly through one or more intermediaries, or exercise significant influence over the other party in making financial and operating decisions. Such relationships also exist between and/or among entities which are under common control with the reporting entity, or between, and/or among the reporting entity and its key management personnel, directors or its stockholders. In considering each possible related party relationship, attention is directed to the substance of the relationship, and not merely to the legal form.

A related party transaction is a transfer of resources, services or obligation between a reporting entity and a related party.

Foreign Currency Transactions

Transactions in foreign currencies are recorded using the exchange rate prevailing at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are restated using the rate of exchange prevailing at the reporting date. Foreign exchange differences between rate at transaction date and the rate at settlement date or financial statement date are credited to or charged against current operations.

Provisions

Provisions are recognized when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. When some or all the expenditure required to settle a provision is expected to be reimbursed by another party, the reimbursement is recognized as a separate asset only when it is virtually certain that reimbursement will be received. The amount recognized for the reimbursement shall not exceed the amount of the provision. Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate.

If the effect of the time value of money is material, provisions are determined by discounting the expected future cash flows at pre-tax rate that reflects current market assessment of the time value of money and the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognized as interest expense.

Contingencies

Contingent liabilities are not recognized in the financial statements. These are disclosed in the notes to financial statements unless the possibility of an outflow of resources embodying economic benefits is remote. A contingent asset is not recognized in the financial statements but disclosed in the notes to financial statements when an inflow of economic benefits is probable.

Events After the Reporting Date

Post year-end events that provide additional information about the Company's financial position at the end of the reporting period (adjusting events) are reflected in the financial statements. Post year-end events that are not adjusting events are disclosed in the notes to financial statements when material.

Comparative

When necessary, comparative figures has been reclassified to conform to the changes in the presentation of the current year.

3. Significant Judgment, Accounting Estimates and Assumptions

The preparation of the financial statements in compliance with PFRS Accounting Standards requires management to exercise judgment, make estimates and use assumptions that affect the amounts reported in the financial statements. The judgment, estimates and assumptions used in the financial statements are based upon management's evaluation of relevant facts and circumstances as at the reporting date. While the Company believes that the assumptions are reasonable and appropriate, significant differences in the actual experience or significant changes in the assumptions may materially affect the estimated amounts. Actual results could differ from such estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods.

Judgment

In the process of applying the Company's accounting policies, management has made the following judgment, apart from those involving estimations which have the most significant effect on the amounts recognized in the financial statements.

Assessment of the Company's Ability to Continue as a Going Concern. The Company has incurred recurring losses that resulted to a deficit amounting to ₱11,646.7 million and ₱11,665.0 million as at December 31, 2024 and 2023, respectively. These factors indicate material uncertainties which may cast doubt on the Company's ability to continue as a going concern.

With the Company's significant progress in fulfilling its obligations under the Corp Rehab and the corporate initiatives as discussed in Note 1, management has assessed that the Company has the ability to continue to operate on a going concern basis.

Revenue Recognition. The Company applied the following judgments that significantly affect the determination of the amount and timing of revenue from contracts with customers:

1. *Identifying Performance Obligations.* The Company identifies performance obligations by considering whether the promised services in the contract are distinct services. A service is distinct when the customer can benefit from the service on its own or together with other resources that are readily available to the customer and the Company's promise to transfer the service to the customer is separately identifiable from the other promises in the contract.

Revenues earned from multiple element arrangements offered by the Company's fixed line and wireless businesses are split into separately identifiable performance obligations based on their relative stand-alone selling price in order to reflect the substance of the transaction. The transaction price represents the best evidence of standalone selling price for the services the Company offers since this is the observable price being charge if the services are sold separately.

2. *Timing of Revenue Recognition.* The Company recognizes revenue from contracts with customers over time or at a point in time depending on the evaluation of when the customer obtains control of the promised services and based on the extent of progress towards completion of the performance obligation. For the telecommunication service which is generally provided over the contract period of two years, because control is transferred over time, revenue is recognized monthly as the Company provides the service.
3. *Identifying Methods for Measuring Progress of Revenue Recognized Over Time.* The Company determines the appropriate method of measuring progress which is either through the use of input or output methods. Input method recognizes revenue on the basis of the entity's efforts or inputs to the satisfaction of a performance obligation while output method recognizes revenue on the basis of direct measurements of the value to the customer of the goods or services transferred to date.

Revenue from telecommunication services is recognized through the use of input method wherein recognition is over time based on the customer subscription period since the customer simultaneously receives and consumes the benefits as the seller renders the services.

Classification of Preferred Stock. The Company has preferred shares which are redeemable and convertible at the option of the Company with no defined period or date over which redemption can take place.

Management has assessed that the preferred stock should be classified as equity as there are no defined period over which conversion or redemption can take place and the Company has control that no preferred shareholders will convert or redeem the shares in the foreseeable future. Moreover, as discussed in Note 1, the Company should list its authorized redeemable preferred shares as freely “tradable” shares with the PSE pursuant to the Rehab Order.

Assessment of the Lease Term of Contracts with Renewal and Terminal Options – The Company as a Lessee. The Company determined the lease term as the non-cancellable term of the lease, together with any periods covered by an option to extend the lease if it is reasonably certain to be exercised, or any periods covered by an option to terminate the lease, if it is reasonably certain not to be exercised.

The Company has several lease contracts that include extension and termination options. The Company applies judgment in evaluating whether it is reasonably certain whether or not to exercise the option to renew or terminate the lease. That is, it considers all relevant factors that create an economic incentive for it to exercise either the renewal or termination. After the commencement date, the Company reassesses the lease term if there is a significant event or change in circumstances that is within its control and affects its ability to exercise or not to exercise the option to renew or to terminate (e.g., construction of significant leasehold improvements or significant customization to the leased asset).

The Company included the renewal period as part of the lease term for leases of office premises, network equipment, and service vehicles with shorter non-cancellable period (i.e., three to five years). The Company typically exercises its option to renew for these leases because there will be significant negative effect on production if a replacement asset is not readily available. Furthermore, the periods covered by termination options are included as part of the lease term only when they are reasonably certain not to be exercised.

Distinction between Property and Equipment and Investment Properties. The Company determines whether a property qualifies as property and equipment or an investment property. In making this judgment, for investment properties, the Company considers whether the property generates cash flows largely independent of the other assets and is held primarily to earn rentals or for capital appreciation. Property and equipment are held for use in the supply of services or for administrative purposes. The Company considers each property separately in making its judgment.

Legal Contingencies. The Company is involved in certain legal proceedings which are ongoing or pending decision by the proper judicial or regulatory bodies. Management, in consultation with legal counsels handling these matters, believes that the outcome of these proceedings will be resolved favorably and will not have significant effect on the financial statements.

Estimates and Assumptions

The key assumptions concerning the future and other key sources of estimation of uncertainty at the reporting date, that have significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next reporting year are discussed below.

Assessment of the Impairment of Financial Assets at Amortized Cost. In assessing ECL, the Company uses historical credit loss experience adjusted for forward-looking factors, as appropriate. For trade receivables, ECL is computed on a lifetime basis using a provision matrix. For other financial assets at amortized cost, ECL is computed on a 12-month or lifetime basis using historical loss experience determined based on the default accounts.

When determining whether the risk of default on a financial instrument has increased significantly since initial recognition, the Company considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Company's historical experience and expert credit assessment and including forward-looking information. A significant increase in credit risk can be measured by comparing the probability of default of the borrower from the initial recognition and the result of the current probability of default. When the result shows an upward movement of the probability of default, the change is considered as significant increase in credit risk.

While cash is subject to impairment, the Company has assessed that the ECL is not material because these are transacted with reputable banks that possess good credit ratings. The Company has also assessed that the Company's trade and other receivables and security deposits have minimal credit risk.

Provision for ECL recognized in 2024, 2023 and 2022 are disclosed in Note 5.

The carrying amounts of financial assets at amortized cost subject to ECL as at December 31, 2024 and 2023 are disclosed in Notes 4, 5, 6 and 19.

Estimation of Retirement Benefits. The costs of defined retirement benefits as well as the present value of the provision for retirement benefits are determined using actuarial valuations. The actuarial valuation involves making various assumptions. These include the determination of the discount rates, future salary increases, mortality rates and future retirement increases. Due to the complexity of the valuation, the underlying assumptions and its long-term nature, retirement benefits liability is highly sensitive to changes in these assumptions. All assumptions are reviewed at the end of each reporting period.

Retirement benefits costs in 2024, 2023 and 2022 are disclosed in Note 12. Retirement benefits liability as at December 31, 2024 and 2023 are disclosed in Note 12.

In determining the appropriate discount rate, management considers the interest rates of government bonds that are denominated in the currency in which the benefits will be paid, with extrapolated maturities corresponding to the expected duration of the defined benefit retirement liability. Further details about the assumptions used are provided in Note 12.

Assessment of the Impairment of Nonfinancial Assets. The Company assesses impairment on nonfinancial assets whenever events or changes in circumstances indicate that the carrying amount of the assets or group of assets may not be recoverable. The relevant factors that the Company considers in deciding whether to perform an asset impairment review include, among others, the following:

- significant underperformance of a business in relation to expectations;
- significant negative industry or economic trends; and
- significant changes or planned changes in the use of the assets.

Whenever the carrying amount of an asset exceeds its recoverable amount, an impairment loss is recognized. Recoverable amounts are estimated for individual assets or, if it is not possible, for the cash-generating unit to which the asset belongs.

Recoverable amount represents the value in use, determined as the present value of estimated future cash flows expected to be generated from the continued use of the assets. The estimated cash flows are projected using growth rates based on historical experience and business plans and are discounted using pretax discount rates that reflect the current assessment of the time value of money and the risks specific to the asset.

Management has assessed that there were no indications that the Company's nonfinancial assets are not recoverable as at reporting date; hence, no impairment loss was recognized in 2024, 2023 and 2022.

The carrying amounts of the Company's nonfinancial assets as at December 31, 2024 and 2023 are disclosed in Notes 5, 6, 7, 8 and 20.

Assessment of the Realizability of Deferred Tax Assets. The Company reviews the carrying amount of deferred tax assets at each reporting date and reduces the amount to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax assets to be utilized in the future. The amount of deferred tax assets that are recognized is based upon the likely timing and level of future taxable profits together with future tax planning strategies to which the deferred tax assets can be utilized.

Deferred tax assets as at December 31, 2024 and 2023 are disclosed in Note 18.

Estimation of Provisions and Contingencies on Legal Proceedings. The Company is currently involved in various legal proceedings which are pending resolution in view of the Company's ongoing Corp Rehab. The estimate of the probable costs for the resolution of these claims has been developed in consultation with in-house and outside counsels handling the Company's defense in these matters and is based upon an analysis of potential results. The Company's management and legal counsels have made judgment that, while the proceedings are legally defensible, they cannot anticipate with certainty the progress and the outcome of the legal proceedings, the appreciation of the available evidence by the relevant courts or tribunal involved and the evolution of jurisprudence or similar cases that will be decided by the highest court, which will be relevant to these pending cases. The Company currently assessed that these proceedings will not have a material adverse effect on its financial position. It is possible, however, that future results of operations could be materially affected by changes in the estimates or in the effectiveness of the strategies relating to these proceedings.

No provisions were made in relation to these ongoing legal proceedings as at December 31, 2024 and 2023.

Estimation of Accrued Interest Based on Corp Rehab Plan. The Company determines the accrued interest based on the outstanding balances of its unpaid obligations to all claimants listed in the Corp Rehab Plan. These obligations are subject to 6% legal interest in accordance with the court-approved Rehab Plan (see Note 1). The management believes that the accrued interest recognized by the Company is reasonable and appropriate following the interpretation of the Corp Rehab Plan.

As at December 31, 2024 and 2023, accrued interest on these obligations are disclosed in Note 9.

Interest expense recognized in 2024, 2023 and 2022 are disclosed in Note 21.

The Company settled labor-related statutory obligations covered by Corp Rehab in 2024 and 2023 as disclosed in Note 10.

4. Cash

This account consists of:

	2024	2023
Cash on hand	₱315,000	₱315,000
Cash in banks	16,390,152	10,936,479

		₱37,089,905	₱69,390,420	₱76,047,894

Depreciation and amortization were charged to the following (see Note 16):

	2024	2023	2022
Cost of sales and services	₱17,486,760	₱30,129,952	₱33,020,688
General and administrative expenses	19,603,145	39,260,468	43,027,206
	₱37,089,905	₱69,390,420	₱76,047,894

Service vehicles, presented under Other Work Equipment, with carrying value of ₱1.7 million and ₱2.2 million as at December 31, 2024 and 2023, respectively, serve as collaterals for bank loans (see Note 11).

In 2024, the Company sold a service vehicle, presented under Other Work Equipment, with a carrying amount of ₱1.7 million for ₱2.1 million, resulting to a gain on sale of property and equipment amounting to ₱0.4 million (see Note 17).

In 2022, the Company sold a service vehicle, presented under Other Work Equipment, at the same amount of its net book value of ₱0.6 million.

The cost of fully depreciated properties still in use amounted to ₱405.7 million and ₱277.1 million as at December 31, 2024 and 2023, respectively.

At Revalued Amount

The Company's land with an acquisition cost of ₱261.7 million is measured using the revaluation model. In 2023, the land was revalued by an independent appraiser using the Sales Comparison Approach method, which considers the sales of similar or substitute properties and related market data, then establishes a value estimate by processes involving comparison.

Details are as follows:

	2024	2023
Cost	₱261,690,000	₱261,690,000
Revaluation Surplus:		
Balance at beginning of year	141,570,000	109,395,000
Addition	—	32,175,000
Balance at end of year	141,570,000	141,570,000
Revalued Amount	₱403,260,000	₱403,260,000

Fair value measurement was categorized as Level 3 and the significant unobservable input used in determining fair values for 2024 and 2023 is discussed as follows:

Price per square meter	₱470,000
Value adjustments	(5%)

Price per square meter pertains to the estimated value prevailing in the real estate market depending on the location, area and time element. Value adjustments are adjustments made to bring the comparative values in approximation to the properties taking into account internal factors such as marketability, location, terrain, size, shape and development.

Sensitivity Analysis. The following factors were considered in determining the market value of the subject property:

- property location and neighborhood data;
- present use of the property is commercial utility;
- quantitative market value adjustments based on internal factors; and,
- highest and best use (commercial utility)

Significant increase (decrease) in price per square meter would result in a significantly higher (lower) fair value measurement. Significant increase (decrease) in value adjustments would result in a lower (higher) fair value measurement.

As at December 31, 2024 and 2023, there were no transfers between levels in the fair value hierarchy.

8. Investment Properties

Movements in this account are as follows:

	2024	2023
Balance at beginning of year	₱40,814,018	₱79,311,918
Disposals	—	(38,497,900)
Balance at end of year	₱40,814,018	₱40,814,018

The Company's investment properties consist of land located in NCR, and Regions 3 and 4, which are held for rentals and for capital appreciation.

The Company sold investment properties costing ₱38.5 million for ₱97.3 million in 2023 (and ₱92.7 million for ₱129.7 million in 2022). These resulted to gain on sale of ₱58.8 million in 2023 (and ₱37.0 million in 2022).

Fair Value

The fair value of the investment properties based on management's assessment using the sales comparison approach amounted to ₱88.7 million as at December 31, 2024 and 2023. Fair value measurement was categorized as Level 3 and the significant unobservable input used in determining fair values for 2024 and 2023 is discussed as follows:

Price per square meter	₱900 to ₱22,500
Value adjustments	(5%) to (15%)

Price per square meter pertains to the estimated value prevailing in the real estate market depending on the location, area and time element. Value adjustments are adjustments made to bring the comparative values in approximation to the properties taking into account internal factors such as marketability, location, terrain, size, shape and development.

Significant increase (decrease) in price per square meter would result in a significantly higher (lower) fair value measurement. Significant increase (decrease) in value adjustments would result in a lower (higher) fair value measurement.

9. Trade and Other Payables

This account consists of:

	2024	2023
Trade	₱208,674,218	₱182,166,422

Remeasurement (gain) loss	(9,027,816)	597,151
Balance at end of year	₱60,625,666	58,449,800

Movements in the cumulative remeasurement gains on retirement benefits liability, net of tax, follows:

	2024	2023
Balance at beginning of year	₱4,718,642	₱5,166,505
Remeasurement gain (loss)	6,770,862	(447,863)
Balance at end of year	₱11,489,504	₱4,718,642

The principal actuarial assumptions used to determine pension for the Company are as follows:

	2024	2023
Discount rate	6.10%	6.11%
Salary increase rate	5.00%	5.00%

The sensitivity analysis below has been determined based on reasonably possible changes of each significant assumption on the defined benefit obligation, assuming all other assumptions were held constant:

	Increase (Decrease)	2024	2023
Discount rates	7.11% (Actual + 1.00%)	₱59,446,426	₱57,182,917
	6.10%	60,625,666	58,449,800
	5.11% (Actual - 1.00%)	61,976,286	59,902,228
Salary increase rate	6.00% (Actual +1.00%)	62,083,498	59,999,162
	5.00%	60,625,666	58,449,800
	4.00% (Actual - 1.00%)	59,330,425	57,075,554

Shown below is the maturity analysis of the Company's undiscounted benefit payments as at December 31:

	2024	2023
Less than 1 year	₱31,525,847	₱14,353,286
1 to less than 5 years	18,571,866	27,587,713

20. Leases

Company as Lessee

The Company has lease contracts for various network equipment for cell sites telecommunications equipment locations and leased poles and other work equipment for car rentals used in its operations which generally have lease terms between one (1) and ten (10) years. The Company's obligations under its leases are secured by the lessor's title to the leased assets. Generally, the Company is restricted from assigning and subleasing the leased assets and some contracts require the Company to maintain certain financial ratios. The Company is required to pay the lessor two (2) to three (3) months advance security deposits which shall be refunded at the end of the lease term. Refundable security deposits amounted to ₱15.8 million and ₱15.6 million, presented as other noncurrent assets in the statements of financial position (see Note 6). There are several lease payments which are further discussed below.

22. Segment Reporting

The Company has only one operating segment which is the broadband internet access services which include, among others: (a) fiber optic dedicated, e-line or shared broadband; (b) wireless dedicated or shared broadband; (c) very small aperture terminal; and (d) gateway peering. Revenues derived from these services consist of fixed monthly subscription rate plus installation charges and other one-time fees associated with the customer service.

The Company shifted its products and services from LEC to broadband data services, fixed wireless services Point to Point and Point to Multipoint Wireless Communications Services and Network Operations Center using the same LEC Network (see Note 1).

23. Financial Instruments

Financial Risk Management Objectives and Policies

The Company's principal financial instruments are cash, trade and other receivables (excluding advances to employees), due from related parties, security deposits, trade and other payables (excluding advance rent and statutory payables), loans payable, lease liabilities and refundable deposits. The main purpose of these financial instruments is to raise funds for the Company's operations. It is the Company's policy that no trading in financial instruments shall be undertaken. The main risks arising from the Company's financial instruments are liquidity risk and credit risk. The general policies for managing each of these risks are summarized below:

Credit Risk

The Company's credit risk is primarily attributable to its cash in bank and trade and other receivables and due from related parties. The Company has adopted stringent procedure in extending credit terms to customers and in monitoring its credit risk.

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss.

The Company manages the level of credit risk it accepts through comprehensive credit risk policy setting out assessment and determination of what constitutes credit risk for the Company; setting up exposure limits by each counterparty or group of counterparties, geographical and industry segments; guidelines on obtaining collateral and guarantees; reporting of credit risk exposures and breaches to the monitoring authority; monitoring compliance with credit risk policy and review of credit risk policy for pertinence and changing environment.

The Company trades only with recognized, creditworthy third parties. It is the Company's policy that all customers who wish to trade on credit terms are subject to credit verification procedures. In addition, receivable balances are monitored on an ongoing basis with the result that the exposure to bad debts is not significant.

The exposure to credit risk arises from default of the counterparty, with a maximum exposure equal to the carrying amount of its financial instruments.

There are no significant concentrations of credit risk within the Company.

The table below shows the maximum exposure to credit risk for the components of the 2024 and 2023 statements of financial position. The maximum exposure is shown gross, without taking into account collateral and other credit enhancement.

The Company evaluates credit quality on the basis of the credit strength of the security and/or counterparty/issuer. High grade financial assets are those which collectability is assured based on past experience. Standard grade financial assets are considered moderately realizable and some accounts which would require some reminder follow-ups to obtain settlement from the counterparties. The Company determines if credit risk have increased significantly when financial assets are more than 30 days past due.

For trade receivables, the Company has adopted a lifetime expected loss allowance in estimating ECL to receivables through the use of a provisions matrix using fixed rates of credit loss provisioning based on recent historical collection rates after incorporating forward-looking information.

For other financial assets at amortized cost, the Company has adopted a 12-month expected loss allowance in estimating ECL to other financial assets at amortized cost, which pertains to the portion of lifetime ECL that result from default events on a financial instrument that are possible within 12 months after the reporting date.

Due from related parties have sufficient liquid asset to pay and the risk of default is assessed to be minimal.

Generally, receivables are written off if collection cannot be made despite exhausting all extra-judicial and legal means of collection. The maximum exposure to credit risk at reporting date is the carrying value of the financial assets. The Company does not hold collateral as security.

Liquidity Risk

Liquidity or funding risk is the risk that an entity will encounter difficulty in raising funds to meet commitments associated with financial instruments. Liquidity risk may result from either the inability to sell financial assets quickly at their fair values; or counterparty failing on repayment of contractual obligation; or inability to generate cash inflows as anticipated.

The Company manages liquidity through a liquidity risk policy which determines what constitutes liquidity risk for the Company; specifies minimum proportion of funds to meet emergency calls; setting up contingency funding plans; specify the sources of funding and the vents that would trigger the plan, concentration of funding sources; reporting of liquidity risk exposures and breaches to the monitoring authority; monitoring compliance with liquidity risk policy and review of liquidity risk policy for pertinence and changing environment.

The Company's objective is to maintain a balance between continuity of funding and flexibility through the use of internally generated funds.

Liquidity risk is the risk that the Company will be unable to meet its payment obligations when they fall due. The Company manages this risk through daily and periodically monitoring of cash flows in consideration of future payment due dates and daily collection amounts. The Company also ensures that there are sufficient, available, and approved working capital lines that it can draw from anytime.

The Company maintains an adequate amount of cash and cash equivalents in the event of unforeseen interruption of its cash collections. The Company also maintains accounts with several relationship banks to avoid significant concentration of cash with one institution.

The following are the contractual maturities of financial liabilities, including estimated interest payments and excluding the impact of netting agreements:

Cash, Receivables, Trade Payables and Accrued Expenses. The carrying amounts of cash, trade receivables and trade payables and accrued expenses approximate their fair value due to their short-term maturity.

Due to/from Related Parties. Advances to related parties have no definite fixed terms and are not expected to be realized within the next 12 months. Accordingly, the fair values are not determinable, as the timing of future cash flows cannot be estimated reliably.

Lease Liabilities. The fair value of the current portion of lease liabilities approximates their carrying value due to the short-term maturities of these liabilities. The fair value of the noncurrent portion of lease liabilities is based on the discounted value of future cash flows using the prevailing interest rate ranging from 7.03% to 7.07% in 2024 and 2023.

Security and Refundable Deposits. The fair value of security and refundable deposits are based on discounted value of future cash flows using the applicable market interest rates. Discount rate ranging from 4.57% to 4.73% were used in calculating the fair values of deposits in 2024 and 2023.

Capital Management

The Company manages its capital to ensure that it will be able to continue as a going concern, while maximizing the return on investments of stockholders.

The Company considers the following as its capital:

	2024	2023	2022
Capital stock	₱10,926,335,673	₱10,926,335,673	₱1,500,000,000

We have audited in accordance with Philippines Standards on Auditing, the accompanying financial statements of PT&T Corp. (Doing business under the name and style: PT&T) (the Company) as at and for the years ended December 31, 2024 and 2023, and have issued our report dated April 11, 2025. Our audit was made for the purpose of forming an opinion on the basic financial statements taken as a whole. The Supplementary Schedule on Financial Soundness Indicators, including their definitions, formulas, calculation, and their appropriateness or usefulness to the intended users, are the responsibility of the Company's management. These financial soundness indicators are not measures of operating performance defined by Philippine Financial Reporting Standards (PFRS) Accounting Standards and may not be comparable to similarly titled measures presented by other companies. This schedule is presented for purposes of complying with the Revised Securities Regulation Code Rule 68 issued by the Securities and Exchange Commission and is not a required part of the basic financial statements prepared in accordance with PFRS Accounting Standards. The components of these financial soundness indicators have been traced to the Company's financial statements as at and for the years then ended December 31, 2024 and 2023, and no material exceptions were noted.
